

# CRAB-GRASS KILLER

DSMA\*

EFFECTIVE - ECONOMICAL

**CAUTION**

KEEP OUT OF REACH OF CHILDREN

SEE OTHER CAUTIONS ON BACK PANEL

\*(Contains Disodium Methyl Arsenate)

Manufactured for  MFA OIL Columbia, Missouri

NET CONTENTS  
ONE PINT

## Crab Grass Killer

**Effectively Controls Crab Grass In Lawns and Turf  
When Used As Directed**

### DIRECTIONS FOR USE

**ESTABLISHED LAWNS:** In late spring or early summer on seedling crab grass in two or three leaf stages, apply one pint mixed in 2 gallons of water per 1,000 square feet of lawn. Follow with two or more treatments at 7 day intervals.

**BRANDIED CRAB GRASS OR LAWNS COMPLETELY OVERRUN WITH CRAB GRASS:** Apply at 1½ pints mixed in 3 gallons of water per 1,000 square feet of lawn. Follow with two more treatments at 7 day intervals. Lawn may discolor from treatment, but if directions are followed, turf grasses will quickly return to normal, if sufficient water is available for turf grass growth.

**IMPORTANT:** Keep lawn mowed 1½ to 2 inches during treatment. Flush sprayer thoroughly with water after using. Delay re seeding for 14 days after last treatment.

**NOTE:** This is a selective crab grass killer at recommended applications in Kentucky Blue Grass, Merion Blue, and Zoysia Grasses. It is best applied when turf is moist and days cool. It is also selective in the presence of sensitive grasses, such as Fescues and Bents. However, only the rates for seedling crab grass control should be used when Fescue and Bent Grasses predominate, to prevent discoloration.

**CAUTION:** Harmful if swallowed. Keep tightly closed when not in use. Avoid contact with skin or breathing of spray mist. Avoid contamination of food or foodstuffs. Keep away from children and domestic animals. Wash hands after using.

**ANTIDOTE:** If taken internally, induce vomiting and call a physician.

ACTIVE INGREDIENTS: Disodium Methylarsenate

6.3%

INERT INGREDIENTS

93.7%

TOTAL

100.0%

Disodium Methylarsenate present in the formulation by weight in pounds per gallon equals .56 pounds.

Total arsenic as elemental, all in water soluble form 2.50%—Equivalent to 10.0% Disodium Methylarsenate Hexahydrate.

Rinse empty container thoroughly with water and discard it.

**WARRANTY:** M.F.A. Oil Company warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use. Neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to M.F.A. Oil Company, and buyer assumes the risk of any such use.
