

DIRECTIONS FOR USE

This is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use a 1% emulsion for subterranean termites. Mix as follows:

Volume of Water	Amount of CTC
1 gallon	1.8 oz. (3 1/2 tablespoons)
5 gallon	9 ounces
50 gallon	5 1/2 pints
100 gallon	11 1/2 gallons

SUBTERRANEAN TERMITES - DIRECTIONS FOR HOMEOWNER USE

TERMITE CONTROL IN EXISTING STRUCTURES

Buildings with Basements or Crawl-Spaces

First remove all wood debris and wood forms. Around piers, pipes, chimney bases and along foundations of poured concrete dig a trench 6 inches wide and 4 inches deep. For brick and block foundations dig the trench about 12 inches deep. If footing is more than 12 inches deep, make holes with a crowbar, pipe or a rod about one foot apart that extend from the trench bottom to the top of the footing. Make holes closer in hard-packed clay soils. NEVER DIG BELOW THE TOP OF THE FOOTING. Apply the emulsion (or solution) in the trench at a rate of 4 quarts per 10 linear feet per foot of depth. Apply half of this to the back-fill. Likewise, treat along the inside of foundations of crawl space buildings. Cover treated soil with a thin layer of untreated soil.

For raised porches, terraces, and entrance slabs, drill holes at one foot intervals, 6 inches from the foundation, and pour one-half gallon of emulsion (or solution) into each hole. Retention slabs with heat ducts or radiating heat pipes should be treated by a commercial pest control operator.

The object is to establish a treatment barrier which will prevent termite entry. Other entry areas may also require treatment, especially if there are inaccessible areas. In slab-type construction, it is suggested that you contact the Agricultural Consultant, State Service for advice or consult a Commercial Pest Control Service.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

May be fatal if swallowed. Do not breathe vapor or spray mist. Do not get in eyes, on skin or clothing. In case of skin contact, wash immediately with soap and water. Avoid contamination of feed and foodstuffs.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and other wildlife. Keep out of lakes, streams, and ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill or store near heat or open flame.

DISPOSAL

DO NOT REUSE EMPTY CONTAINER. WRAP CONTAINER AND PUT IN TRASH COLLECTION.

NOTICE

Bayer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

Avoid contamination of public supplies by following these precautions: Do not allow a hose or any type of equipment to reach into the termite chemical. Do not fill or mix this material in anti-back-flow or anti-siphonage all filling equipment. These are purchased at hardware or plumbing stores. Use of anti-back-flow equipment insures that the user of this product will not contaminate domestic water to Federal (Federal Housing Administration), state, and local specifications of treatment areas from wells, cisterns or ponds should it is water saturated, subject to contamination due to an accumulation of soil to be treated around the structure is at a grade lower than yard or property area. If treated as follows: Do not apply. Soil should be removed to a well or domestic water contact. Allowed to stand undisturbed 24 hours then returned to the trench lined with 4 mil. plastic sheet to puncture the plastic sheet and soil to the trench. Do not treat contain cisterns or wells.

RETREATMENT RESTRICTIONS

1. Retreatment for subterranean termites only be made when there is a reinfestation subsequent to the treatment or there has been a disruption of the barrier in the soil due to construction, landscaping, etc.

2. Retreatments may be made in accordance with the application described above. This application is a spot treatment to the affected area.

Routine treatment of the entire structure should be avoided.

CAUTIONARY STATEMENTS

PERILS AND DOMESTIC ANIMALS

WARNING

Do not breathe vapor or spray mist. Do not get on clothing. In case of skin contact, wash with soap and water. Avoid contamination of surfaces.

ENVIRONMENTAL HAZARDS

Keep out of reach of birds, and other wildlife. Do not contaminate water by disposal of wastes. Apply this product in accordance with label.

PHYSICAL AND CHEMICAL HAZARDS

Do not store near heat or open flame.

DISPOSAL

Empty CONTAINER. WRAP CONTAINER AND RETURN TO STORE.

NOTICE

For safe use, storage or handling of this product, please read directions with care and in accordance with directions given herewith.

Avoid contamination of public and private water supplies by following these precautions. Do not allow a hose or any type of faucet extension to reach into the termite chemical solution while filling or mixing this material with water. Use anti-back-flow or anti-siphonage equipment on all filling equipment. These devices can be purchased at hardware or plumbing supply stores. Use of anti-back-flow equipment will help to insure that the user of this toxic chemical will not contaminate domestic water supplies. Refer to Federal (Federal Housing Administration), state, and local specifications for safe distances of treatment areas from wells. Soil in the vicinity of wells, cisterns or ponds should not be treated if it is water saturated, subject to excessive saturation due to an accumulation of water or if the soil to be treated around the perimeter of the structure is at a grade lower than surrounding yard or property area. If this is the situation treat as follows: **Do not Apply Under Pressure.** Soil should be removed to an area safe from well or domestic water contamination, treated, allowed to stand undisturbed for two to four hours then returned to the trench which has been lined with 4 mil. plastic sheeting. Be careful not to puncture the plastic sheeting when returning soil to the trench. Do not treat structures that contain cisterns or wells.

RETREATMENT RESTRICTIONS

1. Retreatment for subterranean termites should only be made when there is evidence of re-infestation subsequent to the initial treatment or there has been a disruption of the chemical barrier in the soil due to construction, excavations, landscaping, etc.

2. Retreatments may be made to critical areas in accordance with the application techniques described above. This application should be made as a spot treatment to these areas.

Routine treatment of the entire premises should be avoided.

ACTIVE INGREDIENTS	
*Technical Chlordane	74.35%
Deodorized Kerosene	17.65%
INERT INGREDIENTS	8.00%
	100.00%

*Equivalent to 44.61% Octachloro-4,7-Methanotetrahydroindane and 29.74% Related Compounds.

**KEEP OUT OF REACH OF CHILDREN
WARNING**

STATEMENT OF PRACTICAL TREATMENT

If swallowed — Call a physician or Poison Control Center immediately. Drink one or two glasses of water and induce vomiting by touching the back of throat with finger. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.

If inhaled — Remove victim to fresh air. Apply artificial respiration if indicated. If on skin — Remove contaminated clothing and wash affected areas with soap and water.

If in eyes — Flush eyes with plenty of water. Call a physician if irritation persists.
