

PARA-DICHLOROBENZENE

Chemicals

TECHNICAL GRADE - For industrial use only
ACTIVE INGREDIENT, Paradichlorobenzene 100%

SIZE

A

**CAUTION! KEEP OUT OF REACH OF CHILDREN
DO NOT TAKE INTERNALLY**

**CONTAINER HANDLING AND STORAGE:
STORE 'N A COOL PLACE, BUT NOT BELOW 32° F.**

Do not reuse this container.
Destroy it by burying with waste or burning.
Stay away from smoke or fumes.

ENVIRONMENTAL PROTECTION:
Keep out of any body of water.
This product is toxic to fish and wildlife.
Apply this product only as specified on this label.

OPERATIONS SECTION

DIRECTIONS FOR USE

Articles to be protected should be thoroughly cleaned before storage. Remove the dirt and moisture, oil, grease, and oil or grease spots. For best results, see that all containers or closets where Para-Dichlorobenzene is used are sealed as tightly as possible.

The higher the temperature, the faster the vaporization of the crystals. The treatment has its maximum effect at temperatures between 60 and 75 degrees Fahrenheit.

To protect clothing, blankets, or similar articles, first place them in a trunk, chest, or some other reasonably air tight container. Sprinkle PPG Para-Dichlorobenzene crystals over the top layer, then close and seal the lid. One pound of Para-Dichlorobenzene to 75 cubic feet of space is the correct ratio. The crystals should always be placed near the top of the enclosed space because when they vaporize, being heavier than air, will drift downward. Containers should be kept tightly closed at all times and for at least seven days after the treatment. A container may be opened occasionally to add more chemical and close container for the period previously specified. Still better, the articles to be protected may be sealed in paper bags with the crystals. Moisture will not get through the paper and the Para-Dichlorobenzene will destroy any mold or mildew already in the fabric.

DEODORANT

Para-Dichlorobenzene makes an excellent deodorant for control of odors from the refrigerator, in the wash room, in the car, in the trash cans, and in closets. It is remarkably effective and speedily disperses after the crystals settle over the offensive area or placed PPG Para-Dichlorobenzene crystals as near as possible to the center of the trouble. Keep in mind that Para's heavier than air vapor must be allowed to settle downward over the trouble area. Material in order to be effective.
