It is not a parasiticide. It is not a bactericide. It is not a virusicide. It is not a phytotoxin. It is not a plant growth regulator. It is not a plant hormone. It is not a plant nutrient. It is not a plant stimulant. It is not a plant inhibitor. It is not a plant repellent. It is not a plant attractant. It is not a plant repellent. It is not a plant attractant.

# DIRECTIONS FOR USE

## ACTION

- Avoid prolonged breathing of vapors or spray mist
- Avoid contact with skin and eyes
- In case of skin contact, wash with plenty of soap and water and get medical attention
- Keep container closed when not in use
- Avoid prolonged exposure to air to prevent undue moisture pickup

## NOTICE

Sprout Nip Emulsifiable Concentrate is used for treating potatoes after storage and washing. Sprout Nip Emulsifiable Concentrate will prevent wound periderm formation of potatoes, therefore it should be used only after bruises and cuts have healed, not on a minimum of two weeks.

Do Not apply in field.

Do not use on seed potatoes. This inhibition of sprouting at recommended rates is usually effective up to a year. Wash equipment thoroughly with soap and water before using on seed potatoes.

## EQUIPMENT

Sprout Nip Emulsifiable Concentrate is applied as a 1% emulsion on the drying table after the potatoes have been washed.

Spray nozzle should be set to spray evenly across rolls moving the potatoes.

Dryer rolls will distribute Sprout Nip Emulsifiable Concentrate to assure complete coverage of each potato.

## APPLICATION

Dilate Sprout Nip Emulsifiable Concentrate to a 1% emulsion by adding 1 lb. of Sprout Nip Emulsifiable Concentrate to 100 lbs. of water. Agitate enough to form a uniform emulsion.

U.S.D.A. REG. NO. 748-182

Apply at rate of 1 quart of 1% emulsion per 20 bags of potatoes, 100 pounds per bag.

## CONTAINER STORAGE AND HANDLING

Keep container closed.

Do not reuse container for other purposes, especially for handling foodstuffs.

Avoid storage below freezing temperatures. Prolonged storage may result in crystallization. Warming contents and agitation will restore material to liquid condition, but not heat above 100°F.

Avoid contact with other crops, such as plants and potatoes, to prevent accidental germination.
