

ZAPPIE™

SHOCK TREATMENT and Super Chlorinator for Swimming Pools

ACTIVE INGREDIENT: Calcium Hypochlorite
INERT INGREDIENTS

65% AVAILABLE CHLORINE

DANGER! Keep out of reach of children.

See First Aid Instructions, Directions For Use, and additional
Precautions on back panel.

- 65% • **KILLS BACTERIA!**
- 35% • **CONTROLS ALGAE!**
- **DESTROYS ORGANIC CONTAMINANTS!**
- **RESTORES A CRYSTAL CLARITY TO POOL WATER!**

NET WT. 1 LB.
(453.6 G.)

USE ENTIRE BAG IN ONE APPLICATION

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling. Swimming pool water is subject to a build up of a wide variety of organic contaminants including swimmer wastes, such as perspiration, ammonia compounds, and natural and synthetic oils and lotions. If left untreated, the build up of these contaminants could lead to the development of noxious odors, irritating water, and unsightly water clarity problems. These organic wastes which serve as nutrients for bacteria, algae, and other organisms should be removed from the pool on a regular basis to prevent their build up. ZAPPIT™ will effectively reduce organic contamination in swimming pool water resulting in increased water clarity.

Always adjust pH between 7.2 and 7.4 prior to using ZAPPIT™. To oxidize the organic contamination which builds up in pool water, add 1 pound of ZAPPIT™ for every 10,000 gallons of water. Add the total contents of this package all at one time by broadcasting the material directly into the pool water. To prevent any possible bleaching effect on vinyl lined pools, either use a pool brush to disperse and dissolve any undissolved granules setting on the bottom of the pool or predissolve the product in a clean plastic container of water and sprinkle the solution into the pool.

Add ZAPPIT™ at night or when the pool is not in use. Do not use the pool until the free chlorine residual has dropped below 3.0 ppm as determined by using a test kit. ZAPPIT™ should be used weekly during periods of heavy use or when water temperatures are above 80°F and once every two weeks in residential pools receiving normal usage.

Between treatments with ZAPPIT™, continue to maintain the proper water balance and sanitizer level in your pool as recommended on the label of your normal pool sanitizer.

STORAGE AND DISPOSAL: Store this product in a cool, dry, well ventilated area. Keep away from heat sources, sparks, open flames, and lighted tobacco products. After use, rinse empty container thoroughly with water, then place in trash collection.

IN CASE OF FIRE: Drench with water. ZAPPIT™ supplies oxygen, therefore, attempts to smother fire with a wet blanket, carbon dioxide, or a dry chemical extinguisher are ineffective. **IN CASE OF SPILL OR LEAK:** Use extreme caution. Contamination may cause fire or violent reaction. Sweep up spilled material in water. Then immediately use solution as directed.

PRACTICAL TREATMENT (FIRST AID) EYE OR SKIN CONTACT: Flush with plenty of water for at least 15 minutes while removing contaminated clothing. For eye contact get immediate medical attention. If skin irritation occurs, get medical attention. **INHALATION:** Remove to fresh air. If signs of irritation or discomfort occur, take immediately to a hospital or physician. **SWALLOWING:** If conscious, drink large quantities of water followed by any common cooking (vegetable) oil, if available. Do not induce vomiting. Take immediately to a hospital or physician. If vomiting occurs, administer additional water. If unconscious or in convulsions, take immediately to a hospital. Do not attempt to induce vomiting or give anything by mouth to an unconscious person.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER! Highly Corrosive • Causes Skin and Eye Damage • May Be Fatal If Swallowed • Irritating to Nose and Throat • Wear goggles or face shield and rubber gloves when handling. Avoid breathing dust. Remove and wash contaminated clothing and shoes before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with NPDES permit. For guidance, contact the regional office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause violent reactions leading to fire or explosion. Contamination with moisture, acids, organic matter, other chemicals or easily combustible materials such as petroleum or paint products may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of a fire or explosion.
