US ENVIRONMENTAL PROTECTION AGENCY
OFFICE OF PESTICIDES PROGRAMS
REGISTRATION DIVISION (75-767)
WASHINGTON, DC 20460

EPA REGISTRATION NO.

748-237

DATE OF ISSUANCE

SEP 17 1996

TERM OF ISSUANCE

NAME OF PESTICIDE PRODUCT

Zappit

NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION

(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

PPG Industries, Inc.
One PPG Place
Pittsburgh, PA 15272

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

- a. Change "Practical Treatment (First Aid)" to "Statement of Practical Treatment (First Aid)."
- b. Revise the ingestion statement to read: "If swallowed, drink large amounts of water. Do not induce vomiting. Call a physician or poison control center immediately."
- c. Add heading "Precautionary Statements" to "Hazard to Humans and Domestic Animals".

SIGNATURE OF APPROVING OFFICIAL

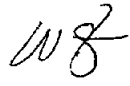

DATE

d. Revise the "Environmental Hazards" statement to read:

"This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

A stamped copy of the product label is enclosed for your records. Submit one copy of the revised final printed label before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Walter C. Francis
Acting Product Manager (32)
Antimicrobial Program Branch
Registration Division (7505C)

PRECAUTIONARY STATEMENTS

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

IN CASE OF FIRE: Drench with water. ZAPPIT[®] supplies oxygen; therefore, attempts to smother fire with a wet blanket, carbon dioxide, or a dry chemical extinguisher are ineffective. **IN CASE OF SKIN OR EYE CONTACT:** Flush with water for at least 15 minutes while removing contaminated clothing. For eye contact, get immediate medical attention. If skin irritation occurs, get medical attention. **IF INHALED:** Remove to fresh air. If signs of irritation or discomfort occur, take immediately to a hospital or physician. **IF SWALLOWED:** If conscious, drink large quantities of water followed by any common poising (vegetable) oil. If available, do not induce vomiting. Take immediately to a hospital or physician. If vomiting occurs, administer additional water. If unconscious, or in convulsions, take immediately to hospital. Do not attempt to induce vomiting or give anything by mouth to an unconscious person.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER! Highly Corrosive • Causes Skin and Eye Damage • May Be Fatal if Swallowed • Irritating to Nose and Throat • Wear goggles or face shield and rubber gloves when handling. Avoid breathing dust. Remove and wash contaminated clothing and shoes before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with NPDES permit. For guidance, contact the regional office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT This only with water. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause violent reactions leading to fire or explosion. **CONTAMINANT:** Contains moisture, acids, organic matter, other chemicals or easily combustible materials such as petroleum or paint. **HAZARD:** Chemical reaction with generation of heat, liberation of hazardous gases and possible generation of a fire or explosion.

ZAPPIT

SHOCK TREATMENT and Super Chlorinator for Swimming Pools

ACTIVE INGREDIENT: Calcium Hypochlorite 67%
INERT INGREDIENTS 33%
MINIMUM 65% AVAILABLE CHLORINE

KEEP OUT OF REACH OF CHILDREN. See EPA Label Instructions and additional Precautions on back panel.
DANGER: See EPA Label Instructions and additional Precautions on back panel.

- KILLS BACTERIA!
- CONTROLS ALGAE!
- DESTROYS ORGANIC CONTAMINANTS!
- RESTORES A CRYSTAL CLARITY TO POOL WATER!

NET WT. 1 LB.
(453.6 G.)

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the Pesticide registered under EPA Reg. No. 748-237

SEP 17 1996

USE ENTIRE BAG IN ONE APPLICATION

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Swimming pool water is subject to a build-up of a wide variety of organic contaminants including swimmer wastes, such as perspiration, ammonia, compounds, and natural and synthetic oils and lotions. If left untreated, the build-up of these contaminants could lead to the development of noxious odors, irritating water, and unsightly water clarity problems. These organic wastes which serve as nutrients for bacteria, algae, and other organisms should be removed from the pool on a regular basis to prevent their build-up. ZAPPIT will effectively reduce organic contamination in swimming pool water resulting in increased water clarity.

Always adjust pH between 7.2 and 7.4 prior to using ZAPPIT. To oxidize the organic contamination which builds up in pool water, add 1 pound of ZAPPIT for every 10,000 gallons of water. Add the total contents of this package all at one time by broadcasting the material directly into the pool water. To prevent any possible bleaching effect on vinyl-lined pools, either use a pool brush to disperse and dissolve any undissolved granules sitting on the bottom of the pool or pre-dissolve the product in a clean plastic container of water and sprinkle the solution into the pool.

Do not use the pool until the free chlorine residual has dropped below 3.0 ppm as determined by using a test kit. ZAPPIT should be used weekly during periods of heavy use or when water temperatures are above 80°F and once every two weeks in residential pools receiving normal usage.

Between treatments with ZAPPIT, continue to maintain the proper water balance and sanitizer level in your pool as recommended on the label of your normal pool sanitizer.

STORAGE AND DISPOSAL: Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry, well ventilated area. Keep away from heat sources, sparks, open flames and lighted tobacco products. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate water food or feed by storage or disposal, or cleaning of equipment.
