PEACHES — PLUMS

BROWN ROT AND SCAB.

DIRECTIONS FOR USE

NUTONEX may be used as a dust or spray. In most cases dusting will prove satisfactory but if a spray is desired this material should be used at the rate of 6 level tablespoons per gallon of water. To control diseases applications should usually be made at 5 to 7 day intervals beginning when the disease first appears, before it becomes widespread. Applications should be continued until all danger from the disease has past.

During periods of humid or rainy weather when conditions are favorable for disease development and spread, it may be necessary to make applications as often as every 2 to 3 days.

To control an infestation of red spiders 2 to 3 applications at 5 to 7 day intervals should be made.

CAUTION: Avoid contamination of feed and foodstuffs. Do not apply this material to Cucumbers, Melons, or Squash. Avoid applying this material during very hot periods of the day.

DISPOSAL WARNING: Dispose of waste pesticide and empty container in a safe place. Never re-use container.
