**LEAD  
ARSENATE  
CONTROLS**

**BAGWORM**

**EASTERN  
TENT CATERPILLAR**

**DANGER:** May be harmful to fish, birds, and bees. Do not apply to water bodies. Wash thoroughly after use. Avoid contact with eyes. Keep away from children and pets.

**POISON**

**ANTIDOTE:** Give a table-spoon of salt in a glass of warm water and repeat until vomit fluid is clear. Then give 2 table-spoons of Epsom Salts or Milk of Magnesia in water and plenty of milk and water. Have victim lie down and keep quiet. Call a Physician immediately.

**PROTECT WILDLIFE:** This product is toxic to wildlife. Birds and other wildlife in treated areas may be harmed.

**PROTECT BEES:** This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

**FRUITS:** On apples, pear, peach and plum to control codling moth, curculio, cankerworm and red-banded leaf roller use at the rate of 2 pounds per 100 gallons of water. On tender foliage such as peach and plum add 8 pounds of Chemically Hydrated Lime to each 100 gallons of spray as a safener. Apply at initial fall and shell-off and at 10 to 15 day intervals as necessary for control. Do not graze livestock in treated orchards. Do not apply to any of the above fruit crops within 30 days of harvest. Remove all residues at harvest by washing, brushing or other effective means.

**GRAPEFRUIT:** Apply within 1 to 6 weeks after bloom at the rate of 0.4 to 1.25 pounds per 100 gallons for white varieties and 0.4 to 0.6 pounds per 100 gallons for pink and red grape-

fruit. The lower amount is used for a high ratio of solids to acids in mid-season and the higher amount for a high ratio in the early season. Do not spray while mature fruit from previous season is present. Do not apply more than 5.4 pounds of actual lead arsenate per acre to white grapefruit nor more than 2.6 pounds of actual lead arsenate per acre to pink or red grapefruit.

**VEGETABLES:** On tomato to control hornworm and tomato fruit worm, spray using 4 pounds per 100 gallons of water. Do not exceed 250 gallons of spray per acre. Repeat as necessary for control. Remove all residue of material from edible parts of vegetables at harvest by thoroughly washing.

**ORNAMENTALS:** For control of bag worms on evergreens such as arborvitae and cedars use 6 pounds per 100 gallons of water when insects are not over half grown. For larger insects use 8 pounds per 100 gallons of water. To control certain other chewing insects such as catalpa sphinx, walnut caterpillar, fall webworm, eastern tent caterpillar and forest tent caterpillar on shade trees use at the rate of 4 pounds per 100 gallons of water.

**DISPOSAL WARNING:** Dispose of waste pesticide and container by burying in non-crop land away from water supplies. Never re-use container.

**DONOT USE OR STORE AROUND THE HOME.**
