NET CONTENTS - 8 FLD. OZS.
(DIRECTIONS CONTINUED)

tablespoonfuls to 3 gallons of water. Do not apply to beans within 7 days of harvest or to other vegetables listed within 2 days of harvest. Do not feed treated vines to meat or dairy animals.

CLOVER MITES IN BUILDINGS: Use 8 ozs. to 25 to 35 gallons of water. Spray outside walls, foundations, window sills, plants and lawn at base of infested building.

CAUTION! Harmful if swallowed. Do not

KELTHANE EC

MITICIDE

ACTIVE INGREDIENT:

1, 1-Bis(p-chlorophenyl)-2
2-trichloroethanol . . . 18.5%

INERT INGREDIENTS: . . . 81.5%

TOTAL 100.0%

© Trademark Rohm and Haas Co.

DIRECTIONS

Kelthane gives high initial kill and long residual activity against most species of mites. It is a specific miticide and will not kill bees and beneficial insect predators. This product is compatible with most other commonly used insecticides and fungicides. It should not be used with lime or with materials not compatible with solvent based pesticide formulations. Apply Kelthane spray to all parts of infested plants, especially the underside of leaves, using sufficient spray for thorough
