# LAWN WEED KILLER

**CAUTION:** Causes irritation of eyes and skin. Do not get in eyes. Wash out immediately or flushed by skin. Do not allow contact with skin and clothing. In case of contact, flush eyes with plenty of water for at least 15 minutes and get medical attention. Wash exposed skin with plenty of soap and water. Do not spray on susceptible plants. Do not use the pump spray equipment for spraying other materials to plants in spray unit. Do not store near fertilizer, insecticides or fungicides.

**DIRECTIONS:** Security Lawn Weed Killer is a non-selective, water-soluble concentrate of 2,4-D. It combines into one product the advantages of both the

**When to Apply:** Best results are obtained when application is made to weeds that are young and actively growing. Application in early spring or after fall rains is most desirable. Fall treatment of crabgrass is advised as it grows very rapidly in cool weather. Heavily infested lawns may require repeat applications to kill these weeds. Some areas may be re-treated in 3-4 weeks. Do not apply to newly established lawns until after at least two mowings. Do not apply during periods of drought. Watering and fertilizing schedules should be maintained before and after spraying.

**Timing of Spray Solutions:** For small areas add 4 tablespoons (2 fluid ounces) in two gallons of water per 1,000 square feet. Measure carefully. For larger areas
