POWDERED CUBE

CONTAINS 5% ROTENONE

ACTIVE INGREDIENTS:

Rotenone	5%
Other Cube' Resins	1%

INERT INGREDIENTS:	85%
---------------------------------	-----

E. P. A. Reg. No. 769-414	TOTAL	100%
---------------------------	-------	------

CAUTION! KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed or absorbed through skin. Avoid contact with skin. Wear clean clothing.

PROTECT WILDLIFE: This product will kill fish. Keep out of any body of water unless intended for rough fish control. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS

FISH PONDS: For elimination of undesirable species of fish prior to stocking or restocking of ponds, use this material at the rate of 1.3 lbs. per acre foot of water (25 parts Rotenone per billion parts water). Water temperature should be at least 60° F at time of treating. If the pond contains catfish, warmouth, golden shiner, suckers or other hard to kill species, use 3 pounds per acre foot (50 parts per billion). Under some conditions retreatment 5 days after initial treatment may be desirable to make certain that no undesirable fish escaped. This should be done however only after consultation with your State Game and Fish Authorities. In cases of high turbidity of the water consult your State Game and Fish Authorities for special instructions. Distribute the powder evenly over the surface of the water and agitate to mix thoroughly. This may be accomplished by spraying on the surface and running back and forth with an outboard motor boat or a slurry of the powdered cube can be prepared and poured directly behind the outboard motor or put material in a burlap sack and trail behind motor boat. Frequent kneading of bag is necessary. In small ponds distribution may be accomplished by pouring a slurry directly behind the outboard motor while the boat is pulled up on the bank. It may be necessary to move the boat to several different locations to get thorough distribution. Where ponds have been partially drained, small pools and muck areas should also be treated.

The term "acre-feet" designates a unit of volume having an area of one acre and a depth of one foot and is determined by multiplying the average depth by the total surface area.

To determine the amount of material to use, multiply the number of acre-feet of water to be treated by 1.3 lbs. per acre-foot. Rotenone is not effective in water with a pH above 8.0.

RESTOCKING: Wait 2 to 4 weeks after treatment before restocking. Fish should be stocked in wire cages in the best part of the treated water. After the water has cleared in 24 hours, the water may be restocked.

NOTICE: Water alkalinity, temperature and turbidity may affect the activity of the water. Because these factors change the effectiveness of the product, consult your State Game and Fish representative before use to determine the correct concentration of this product needed for the type kill desired.

CAUTION: It is a violation of State Game and Fish Laws to use Rotenone as a fish poison in running streams, public lakes or without the consent of the owner of a private pond. It is suggested that you contact your Game and Fish Department before this chemical is used. Purchasers of this material are hereby warned that such misuse of this material may result in prosecution. Woolfolk Chemical Works, Ltd. and the seller therefore disclaim any responsibility for any misuse of this product.

VEGETABLES: To control Mexican Bean Beetle, Bean Leaf Beetle, Asparagus Beetle, Spotted and Striped Cucumber Beetles, Flea Beetles, Imported Cabbage Worm and Cabbage Looper on Asparagus, Beans, Beets, Brussel Sprouts, Broccoli, Cabbage, Collards, Cucumbers, Eggplant, Spinach, Tomatoes, Turnips, Lettuce and Peas, use 4 to 6 pounds per 100 gallons of water. Repeat as necessary for effective control. To control Mexican Bean Beetle direct material to underside of leaves. Do not apply more than 10 pounds of this product per acre. Do not apply within 1 day of harvest.

DISPOSAL WARNING

Dispose of waste pesticide and container by burying in non-crop land away from water supplies. Never re-use container.
