In EPA Letter Dated:

DEC 16 1983

Product of Woolfolk Chemical Works, Inc.,
Firm registered under the Act
to the Federal Government, File
No. 769-431

POISON

pint per acre. To control boll weevil and bollworm in mid and late season apply at the rate of 1 1/2 pints per acre. For early season thrips control and weevil control apply at the rate of 2 1/2 pint per acre in sufficient water for coverage, using one nozzle per row. Make the first application when cotton reaches the 4-leaf stage or earlier if thrips begin to cause injury. Make 1 to 3 additional applications at 7 to 10 day intervals as necessary for control. Mid-season applications for boll weevil and bollworm should be at the rate of 1 1/2 pints per acre. Use 3 nozzles per row and apply with sufficient water for coverage, usually 6 to 8 gallons per acre. Airplanes should apply 1 to 3 gallons of water per acre. Begin boll weevil control when insect injury is seen or when 10% of squares are punctured. Repeat applications at 5 day intervals until 4 have been made. Repeat a series of 4 applications if punctured squares reach 10%. Anytime bollworm eggs and 4 to 5 small worms are found per 100 terminals examined, apply the material on a 5 day schedule until control is obtained. For late season protection of bolls apply 1 1/2 pints per acre on a 4 to 5 day schedule as necessary.

SOYBEANS: Cotton bollworm (corn earworm and budworm) in cotton growing states only. Use 1 quart per acre in sufficient water for coverage. Airplanes should apply 1 to 3 gallons per acre in diluted spray and ground equipment 6 to 8 gallons. Begin application when count shows one bollworm per 3 feet of row. Repeat as necessary. Do not spray soybeans within 20 days of

harvest.

**STORAGE
& DISPOSAL**

STORAGE: Store pesticide in original container and place in a locked storage area. Opened pesticide containers should be securely resealed prior to storage. Protect from penetration of moisture, excessive heat or cold. Avoid cross-contamination with other pesticides or fertilizers. Use caution when storing pesticides in the stacks.

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide spray mixture or rinsate is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your state pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. **CONTAINER DISPOSAL:** Triple rinse (or equivalent), then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities.

NOTICE

**DISCLAIMER OF WARRANTY,
MERCHANTABILITY AND LIABILITY**

If for any reason this product is not used, stored, applied, transported or disposed of in accordance with the instructions set forth on this label, then and thereafter Woolfolk Chemical Works, Inc. terminates, ends and concludes all warranties expressed or implied, including the warranty of merchantability and fitness.

Cotton Spray
EPA Registration No. 769-431
Your Submission Dated October 24, 1983

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

However, before you release this product for shipment, submit to us final printed labels incorporating the following label revisions:

- a. For EPA Registration No. 769-376, change the reentry interval under "Protective Clothing Required" to read 48 hours.
- b. For EPA Registration No. 769-382, delete the words "at least" preceding the wording 24-hours under the caption Protective Clothing Required.
- c. For EPA Registration No. 769-431, under the caption Protective Clothing Required, delete the phrase at least 2 hours and replace
