SECURITY

METHYL PARATHION EC - 6

CONTAINS 6 POUNDS METHYL PARATHION PER GALLON

ACTIVE INGREDIENTS:

O, O-dimethyl O-p-nitrophenyl phosphorothioate	[illegible]
Aromatic Petroleum Distillate	[illegible]
INERT INGREDIENTS:	[illegible]
E. P. A. Reg. No. 769-440 TOTAL	100

DO NOT USE, POUR, SPILL, OR STORE NEAR HEAT OR OPEN FLAME

POISON

ANTIDOTE AND FIRST AID TREATMENT

DANGER! KEEP OUT OF REACH OF CHILDREN. Poisonous if swallowed, inhaled or absorbed through skin. Rapidly absorbed through skin. Repeated inhalation or skin contact may, without symptoms, progressively increase susceptibility to Methyl Parathion poisoning. Do not get on skin or on clothing. Do not breathe mist. Wear clean natural rubber gloves, clean waterproof protective clothing and goggles. Replace gloves frequently and destroy used gloves. Wear a respirator of a type passed by the U. S. Bureau of Mines for Methyl Parathion protection. Wash thoroughly with soap and water after handling and before eating or smoking. If the material gets in the eyes, immediately flush with water for at least ten minutes and get medical attention. In case of contact, remove all contaminated clothing and wash skin with soap and water, wash clothing before reuse.

PROTECT WILDLIFE. This product is toxic to fish and other wildlife. Birds feeding on treated areas may be killed. Do not contaminate lakes, streams, or ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from treated areas. Shrimp and crab may be killed at application rates specified on this label. Do not apply where these are important to the local economy. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

PROTECT BEES. This product is highly toxic to bees exposed to direct treatment or residues on crops. Do not apply this product or allow it to drift to blooming crops or weeds if bees are foraging in the area. Consult your Cooperative Agricultural Extension Service for further information.

ATROPINE IS THE EMERGENCY ANTIDOTE FOR METHYL PARATHION POISONING. [illegible] Atropine sulfate may be administered [illegible]

NOTE TO PHYSICIAN

WARNING SYMPTOMS: [illegible]

TREATMENT: [illegible]

DIRECTIONS

[illegible]

COTTON: Boll Weevil, Aphids, Cotton Leafworm, Fleahopper, Thrips, and some species of Spider Mites - Apply at the rate of 1 2/3 to 2 2/3 pints per acre in sufficient water for coverage. Begin applications when insect infestation warrants and repeat at 4 to 5-day intervals as necessary for control.

BOLLWORM: This product will not control bollworms at the above rate. When this pest is present, increase the rate of Methyl Parathion EC-6 to 3 1/3 pints per acre. Do not apply this product within 7 days of hand picking or harvest. Cotton which has been treated with this material should not be grazed.

VEGETABLES: Aphids, Armyworms (up to 3rd instar), Flea Beetles, Leafhoppers and certain species of Mites. On Celery, Peas, Peppers, Potatoes, Lettuce, Spinach - Apply at the rate of 2 2/3 pints per acre. On Carrots, Beets, Tomatoes - Apply at the rate of 2 2/3 pints per acre. Do not use treated carrot tops for food or feed. On Beans, Cole Crops, Brassicas, Brussels Sprouts, Cabbage and Cauliflower) - Apply at the rate of 1 1/3 pints per acre. Begin applications when insects appear; repeat as necessary for control. Do not apply to Potatoes within 5 days of harvest, to Carrots, Celery, Peas, Peppers, Beets (where tops are not used for food), Beans (except green beans), and Tomatoes within 2 days of harvest, to Beets, Lettuce, Spinach, Green Beans within 3 days of harvest.
