FERBAM - PARATHION DUST

CONTROLS TOBACCO INSECTS AND BLUE MOLD IN PLANT BED

ACTIVE INGREDIENTS:

*Ferbam	11.4%
**Parathion	1.0%

INERT INGREDIENTS:	87.6%
---------------------------------	-------

*Ferric Dimethyldithiocarbamate contains 1.53% iron as metallic	TOTAL	100.0%
---	-------	--------

**O,O-diethyl O-p-nitrophenyl thiophosphate

E. P. A. Reg. No. 769-441

WARNING! KEEP OUT OF REACH OF CHILDREN.

May be fatal if swallowed, inhaled or absorbed through skin! Rapidly absorbed through skin. Do not get in eyes or on skin. Wear natural rubber gloves, protective clothing and goggles. In case of contact, wash immediately with soap and water. Wear a mask or respirator of a type passed by the U. S. Bureau of Mines for parathion protection. Keep all unprotected persons out of operating areas or vicinity where there may be danger of drift. Vacated areas should not be re-entered until drifting insecticide and volatile residues have dissipated. Do not contaminate feed and foodstuffs. Wash hands, arms and face thoroughly with soap and water before eating or smoking. Do not apply when conditions favor drift.

ANTIDOTE: IF SWALLOWED and victim is conscious, give a tablespoonful of salt in a glass of warm water and repeat until vomit fluid is clear. Have victim lie down and keep quiet. Call A Physician Immediately! Atropine is antidotal. **NOTE TO PHYSICIAN:** Administer atropine sulfate in large doses, TWO to FOUR mg. intravenously or intramuscularly as soon as cyanosis is overcome. Repeat at 5 to 10 minute intervals until signs of atropinization appear. 2-PAM Chloride is also antidotal and may be administered in conjunction with atropine. **DO NOT GIVE MORPHINE OR TRANQUILIZERS.** IF ON SKIN: In case of contact, remove contaminated clothing and immediately wash skin with soap and water.

PROTECT WILDLIFE: This product is toxic to fish and wildlife. Birds and other wildlife in treated areas may be killed. Keep out of lakes, streams, ponds. Do not apply where run-off is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

PROTECT BEES: This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

DIRECTIONS

TOBACCO PLANT BED: To control Blue Mold, Aphids, Midge and Green June Beetle larvae, dust small plants for the first through the fourth dusting at the rate of 1½ pounds per 100 square yards of plant bed. Increase the rate to 2½ pounds for the fifth and sixth applications, and subsequent applications at 3½ pounds. Begin dusting at first sign of insect damage. Repeat as necessary. At first signs of blue mold, dust at maximum recommended rate.

Begin dusting as soon as blue mold appears in your tobacco section and continue twice each week until all danger of blue mold has passed or until all plants are affected and recovery is evident. Dust after every rain even if 3 or 4 dustings are required each week. Plants may be dusted when either wet or dry if the wind is not blowing. Beds less than 4 feet wide can best be dusted through the cover if it is at least 6 inches above the ground. For wider beds, it will be necessary to remove the cover and walk along lanes every 5 to 6 feet.

A good hand crank duster with a blowery tube several feet long and at least 1½ inches in diameter is most satisfactory for applying dust. Sacks or the small plunger-type dusters are unsatisfactory.

DISPOSAL WARNING

Dispose of waste pesticide and container by burying in non-crop land away from water supplies. Never reuse container.
