DANGER

STATEMENT OF PRACTICAL TREATMENT

IF IN EYES: Flush eyes immediately with plenty of water for at least 15 minutes. Call a physician. IF ON SKIN: Wash with soap and water. IF INHALED: Remove victim to fresh air.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage. Wear goggles, face shield or safety glasses when handling. Avoid inhalation of dust or spray mist. Avoid contact with skin.

AVOID CONTAMINATION OF FEED AND FOODSTUFFS.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of waste. Apply this product only as specified on this label.

PHYSICAL OR CHEMICAL HAZARDS

Protect from excessive heat. Store in a cool, dry place.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

MIXING DIRECTIONS: SECURITE CAPTAIN GARDEN SPRAY is a wettable powder specially formulated to mix easily with water to form a suspension for spray application. Simply add required amount of product to clean water and stir until completely dispersed. This product may be combined with most conventional application equipment, antifoams and surfactants.

FRUITS

To control the diseases listed for each crop below, apply 4 tspsecure CAPTAIN GARDEN SPRAY per gallon of water (2 lbs. per 100 gallons). Spray to the point of run-off.

APPLES (leaf, fruit spot, sooty blotch, flyspeck, flyspeck, bitter rot, botrytis rot, black rot): Apply at weekly intervals beginning at first-pink and continuing through petal-fall spray: 10 to 14 day intervals thereafter until harvest.

APRICOTS (brown rot or sun blight and jacket rot): Apply at red bud stage, bloom and repeat at 7 to petal-fall.

CRABES (leaf spot, bitter rot, botrytis rot): Apply at pleurot, bloom and petal-fall.

GRAPE (downy mildew, black rot): Apply first application at first bloom, just after bloom and 7 to 10 days after bloom. Make 1 to 2 additional applications at 7 to 10 day intervals for susceptible varieties. To aid in control botrytis: Apply when clusters are 1 to 2 inches long. Repeat application when clusters are 4 to 6 inches long.

PEACHES, PLUMS, PRUNES: (brown rot and leaves) Apply at pink bud, full bloom, petal-fall and shuck-fall stage. Repeat 7 to 10 days later and every 14 to 14 days until harvest.

BEST DOCUMENT AVAILABLE
PEARLS (scab): Apply during early finger stage, petal-fall, when first leaves unfold and every 21 days for 3 additional sprays. Blossom may be produced on Bosc pears. Do not use on D'Anjou pears.

RASPBERRIES (spur blight, anthracnose): Apply when canes are 8 to 10 inches long and 2 weeks later. Fruit rot: Apply 3 to 5 days before harvest, mid-harvest, 8 to 10 days later.

STRAWBERRIES (botrytis rot): Apply when new growth starts in spring. Repeat applications weekly to harvest. For severe infection, continue through harvest period, treating immediately after each picking.

SEED TREATMENT (seed rot, damping-off) - BEANS, CABBAGE, CORN, MELONS, PEAS, SQUASH - Use 1/2 teaspoon per pound of dry seed. BEETS, CHARD, SPINACH, GRASS - Use 1 teaspoon per pound of dry seed. Mix thoroughly in paper bag or glass jar. Do not use treated seed for feed or food or oil purposes.

SOIL and GREENHOUSE BENCH TREATMENT: Preplanting for damping-off and root rot diseases on seedlings or transplants of roses and other shrubs and trees, many flowers and vegetables such as beans, peas and cucurbits and lawn seedbeds - Apply as a dust or 4 to 5 oz. per 1000 square feet or spray 4 teaspoons per gallon of water using 15 gallons to each 1000 square feet. Cultivate into upper 3 or 4 inches of soil before planting.

ORNAMENTALS - AZALEAS, CARNATIONS, CHRYSANTHEMUMS (damping-off): Dip cuttings in a suspension of 2-1/2 tablespoons per gallon of water before bedding. CARNATIONS (rust, alternaria leaf spot); CHRYSANTHEMUMS (botrytis flower blight): Apply 4 teaspoons per gallon of water beginning at first sign of disease and repeat at 7 to 10 day intervals. Use the shorter interval under conditions favorable to infection.

GLADIOLUS, TUBULARIS BULBULAS (rot, damping-off): Mix 4 teaspoons per gallon of water and dip bulbs for 30 minutes. Stir, drain and plant.

ROSES (black spot): Apply 4 teaspoons per gallon of water at first sign of disease and repeat at 7 to 10 day intervals. Use the shorter interval under conditions favorable to infection.

LAWNS, TURF: To control brown patch, damping-off, leaf spot and root rot, mix 4 teaspoons per gallon of water and apply to 100 square feet of turf. Repeat at 7 to 10 day intervals or as needed. For melt-out, use 5 to 8-1/2 teaspoons per gallon and apply to 100 square feet beginning when grass resumes growth in the spring (March-April). Repeat at 7 to 10 day intervals or as long as cool, wet weather persists. Do not spray treated areas or feed clippings to livestock.

VEGETABLES: Unless otherwise specified, the following vegetable diseases can be controlled using a standard rate of 4 teaspoons per gallon of water. Spray for thorough coverage.

CABBAGE (cauliflower head, clubroot): Apply at first sign of disease and repeat at 6 to 10 day intervals.

CUCURBITS (cantaloupes, cucumbers, summer and winter squash, pumpkin, melons, squash, watermelon mildew): Apply at 5 to 7 day intervals immediately at first sign of disease and continue as necessary to keep diseases under control.

LETTUCE, SPINACH (downy mildew): Apply at first sign of disease and repeat at 7 to 10 day intervals as necessary to maintain control.
