

U.S. ENVIRONMENTAL PROTECTION AGENCY  
 OFFICE OF PESTICIDES PROGRAMS  
 REGISTRATION DIVISION (WH-567)  
 WASHINGTON, D.C. 20460

**NOTICE OF PESTICIDE:**  REGISTRATION  
 REREGISTRATION

*(Under the Federal Insecticide, Fungicide,  
 and Rodenticide Act, as amended)*

EPA REGISTRATION NO.  
769-552

TERM OF ISSUANCE  
*Until Reregistration*

NAME OF PESTICIDE PRODUCT  
*Security Brand Home Depoite  
 Wrasner*

DATE OF ISSUANCE  
*3/18/85*

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

*Wellfolk Chemical Works, Inc.  
 P.O. Box 938  
 East Valley, GA 30130*

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment:
  - a. Add the phrase "EPA Registration No. 769-552."
  - b. Delete from the front panel the wording "Does not contain Chlordane".
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further specification of final printed labeling.

If these conditions are not complied with, the registrant will be subject to cancellation in accordance with FIFRA sec. 4(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

SECURITY BRAND  
HOME  
TERMITE PREVENTER

with COMMENTS  
in EPA Letter Dated:

MAR 18 1985

DOES NOT CONTAIN CHLORDANE  
TREATS 31 LINEAR FEET

Insecticide,  
Act  
No.  
EPA Reg. No.

ACTIVE INGREDIENTS:

Chlorpyrifos [O,O-diethyl O-(3,5,6-trichloro-2-pyridyl)phosphorothate] 769-552 12.6%

INERT INGREDIENTS:----- 87.4%  
100.0%

EPA REG. NO. 769-

EPA Est. 769-GA-1

Contains 1 pound chlorpyrifos per gallon.

KEEP OUT OF REACH OF CHILDREN

WARNING

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS

CAUSES EYE IRRITATION. HARMFUL IF SWALLOWED. Do not take internally. Do not get in eyes, on skin or clothing. Wash thoroughly after handling and before eating or smoking. Wash contaminated clothing before reuse. Avoid breathing vapors and spray mist. Keep container closed. Handle concentrate in a ventilated area.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Do not induce vomiting. Contains aromatic petroleum solvent. Call a physician immediately. IF ON SKIN. Remove contaminated clothing and immediately wash skin with plenty of soap and water. IF IN EYES: Flush eyes with plenty of water. Call a physician. NOTE TO PHYSICIAN: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine only by injection is an antidote.

ENVIRONMENTAL HAZARDS

Toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of waste.

PHYSICAL OR CHEMICAL HAZARDS

COMBUSTIBLE. Do not use or store near heat or open flame. If stored below 55° F, crystals may form in this product. If crystals are present, warm to 70° F and shake occasionally until crystals disappear.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. DIRECTIONS FOR HOMEOWNER USE: Wear suitable protective equipment and clothing when using or handling this product to help avoid exposure to eyes and skin. As a minimum, face shield or goggles, neoprene or natural rubber gloves and footwear, a long-sleeved shirt and long-legged pants or coveralls are recommended. A mask or respirator is suggested for application in confined areas.

SUBTERRANEAN TERMITES (Reticulitermes, Zootermopsis, Heterotermes and Coptotermes species) - TERMITE CONTROL IN EXISTING STRUCTURES - Buildings with basements or crawl spaces.

DILUTION: To make a 0.5% solution, mix 1/2 gallon of product to 12 gallons water and apply this solution as described below.

APPLICATION: First remove all wood debris and wood forms. Dig a trench 6 inches wide and 4 inches deep around all piers, chimney bases and along foundations of poured concrete. For brick and block foundations, dig the trench about 12 inches deep. If footing is more than 12 inches deep, make holes with a crowbar, pipe or rod about one foot apart that extend from the trench bottom to the top of the footing. Make holes closer in hard-packed clay soils. NEVER DIG BELOW THE TOP OF THE FOOTING.

Apply the solution in the trench at the rate of 4 gallons per 10 linear feet per foot of depth. Apply 1/2 of this to the back-fill. Likewise, treat along the inside of foundations of crawl-space buildings. Cover the treated soil with a thin layer of untreated soil or other suitable barrier such as polyethylene sheeting. Do not apply this product as a overall treatment to soil in crawl spaces.

For raised porches, terraces, and entrance slabs, drill holes at one-foot intervals, 6 inches from the foundation and pour one-half gallon of solution into each hole. Refill holes. Slabs with heat ducts or radiating heat pipes should be treated by commercial pest control operators.

The objective is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment, particularly if there are inaccessible areas, basements or slab-type construction. It is suggested that you contact the Agricultural Extension Service for advice or consult a commercial pest control service.

**RETREATMENT PRECAUTIONS:** Retreatment for subterranean termites should only be made when there is evidence of reinfestation subsequent to the initial treatment, or there has been a disruption of the chemical barrier in the soil due to construction, excavations, landscaping, etc. Reapplication should be made as a spot treatment to these areas. Annual retreatment of the entire premises must be avoided.

**DO NOT CONTAMINATE WATER SUPPLIES:** Avoid contamination of public and private water supplies by following these precautions. Do not allow a hose or any type of faucet extension to reach into the termite chemical solution while filling or mixing this material with water. Use anti-backflow or anti-siphonage equipment on all filling equipment. These devices can be purchased at hardware or plumbing supply stores. Use of anti-backflow equipment will help to insure that the user will not contaminate domestic water supplies with this chemical. Consult federal (Federal Housing Administration), state and local specifications for safe distance of treatment from wells. Soil in the vicinity of wells, cisterns or ponds should not be treated if it is water saturated, subject to excessive saturation due to an accumulation of water, or if the soil to be treated around the perimeter of the structure is at a grade lower than surrounding yard or property area. If this is the situation, treat as follows: remove soil to an area safe from well or domestic water contamination, treat soil, allow to stand undisturbed for two to four hours, then return to the trench which has been lined with 4 mil plastic sheeting. Be careful not to puncture the plastic sheeting when returning the soil to the trench. Apply a layer of untreated soil over treated soil. **DO NOT** treat structures that contain cisterns or wells. **DO NOT** retreat for a minimum of twelve months.

#### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Store pesticide in original container and place in a locked storage area. Do not reuse container. Rinse thoroughly and securely wrap original container in several layers of newspaper and discard in trash.

**NOTICE:** The seller makes no implied warranty of merchantability nor any other warranties which extend beyond the description on this label.
