Liquid Edger

ACTIVE INGREDIENT:

Dimethylarsinic Acid (Cacodylic Acid)	0.09%
Sodium Cacodylate	0.53%
OTHER INGREDIENTS:	<u>99.38%</u>
TOTAL	100.00%

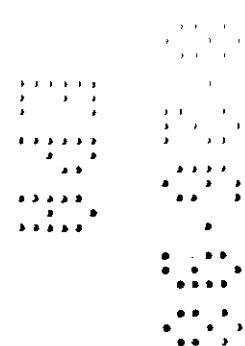

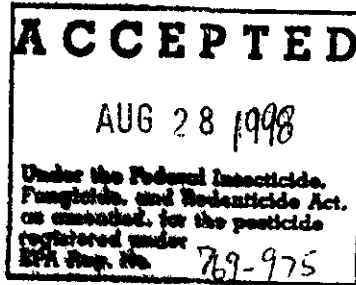

Total arsenic content as elemental, all in water soluble form 0.30%

KEEP OUT OF REACH OF CHILDREN

CAUTION

See side panel for Precautionary Statements and First Aid

NET CONTENTS: 24 FL. OZ., 32 FL. OZ. [1 Qt.], 1 Gallon

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **READ ENTIRE LABEL BEFORE USING THIS PRODUCT. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.**

When Weed and Grass Killer is applied it kills most weeds and grasses on contact. Weed and Grass Killer may be used around bushes trees or shrubs. Excellent for use around patios, sidewalks, driveways, fences, decks, retaining walls, foundations, and curb sides.

TRIM AND EDGING TREATMENT:

For use along driveways, sidewalks, fence lines, patios, and parking lots. Apply anytime during the growing season. Shake well. Remove cap from the applicator head making certain that the applicator head is screwed firmly onto the container. Invert the container, holding it away from the body to avoid contact with skin or clothing. Apply Liquid Edger to thoroughly wet foliage of unwanted vegetation. Avoid unnecessary runoff. The width of the sprinkling pattern may be adjusted by raising or lowering the container. Maximum control will be achieved during warm sunny weather and when unwanted vegetation is actively growing. Wilting will occur in 1 to 3 days and complete browning in bout 5 to 7 days. Avoid drift to desirable foliage. Heavy lawn grasses and difficult to control perennial weeds such as Bermudagrass and Dallisgrass will require more than one application to give complete control of top growth.

SPOT TREATMENT:

To kill unwanted vegetation along side walks, patios, driveways, fences, retaining walls, around shrubs, trees, and bushes. Shake well. Use as provided for spot treatment of weeds. Adjust nozzle to give a coarse spray. Aim at center of weed and spray for thorough wetting and complete coverage of all unwanted vegetation. For tall weeds or grasses, cover foliage thoroughly and repeat in 5 days if necessary. To kill the leaves on Poison Ivy, Brambles, Briars, and Stump Sprouts, wet all foliage thoroughly and repeat if new growth develops. For most rapid kill, apply during warm, sunny weather. Do not apply during windy conditions that will carry spray to desired vegetation. Product will cause brown or yellowing dead spots in lawn.

LAWN RENOVATION

Mow grass to about 1 inch height. Apply Weed and Grass Killer at any time during the growing season, preferably on a bright sunny day. Shake well. Cover foliage thoroughly, 1 gallon will treat 300 sq. ft [24 FL. OZ will treat 55 square feet][32 FL. OZ. will treat 75 square feet]. Weed and Grass Killer works only through foliage, not the root system. Average turf should be brown and dead within 5 days. Certain weeds and grasses may require a second application. When all vegetation is dead, treated area should be raked. Water area heavily prior to seeding. Seeding, sodding, or sprigging may be done 5 days after application. Keep area moist. On sunny days, water if possible at mid-day until plants are established.

USE PRECAUTIONS

Care should be taken when treating weeds in flower beds or around shrubs and ornamental plantings. Do not allow spray to come in contact with foliage, green bark, grafted unions, or

Optional Marketing Claims

- Kills listed unwanted vegetation
- Kills listed weeds and grasses
- Kills listed weeds and grass
- Controls listed unwanted vegetation
