ACCEPTED

SEP 27 1999

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 773-68

0061-5223-01

DOMINATOR®

Insecticide
Ear Tags

For up to 5 months control of horn flies (including synthetic pyrethroid-resistant horn flies) and as an aid in the control of face flies, use two tags per head on beef and non-lactating dairy cattle and calves.

Active Ingredient:
Pirimiphos-Methyl 0-[2-diethylamino-6-methyl-4-pyridinyl] 00-dimethyl phosphorothioate 20%
Inert Ingredients: 80%
100%

KEEP OUT OF REACH OF CHILDREN
CAUTION

Net Wt. 9.5 grams per tag
Contents: 20 tags and buttons
EPA Reg. No. 773-68
EPA Est. No 6175-LA-1
U.S. Patent No. 4,953,313, Inserts Licensed
from Y-Tex Under U.S. Patent No. 4,581,834

Dominator® Insecticide Ear Tags

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed or absorbed through the skin. Wear nonpermeable protective gloves when applying or removing tags. Wash thoroughly with soap and water after handling and before eating and smoking.

Note to Physician: This product is a cholinesterase inhibitor. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not add directly to water. Do not contaminate water by disposal of used tags. Use this product only as specified on this label.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of pesticide application.

FIGURE 1
Place male button onto pin until it projects through the tip.

FIGURE 2
Dip tag button into disinfectant solution.

FIGURE 3
Press female tag under the clip by depressing lever.

FIGURE 4
Apply through ear between second and third ribs, halfway between ear tip and head.

For optimum control and to minimize development of insect resistance, use two tags per animal (one in each ear). All animals in the herd should be tagged. Apply when flies first appear in spring. Replace as necessary. Apply with Allflex® Tagging System. Tags remain effective up to 5 months. Remove tags in fall.

Continual exposure of horn flies to a single class of insecticide (e.g., pyrethroids or organophosphates) may lead to the development of resistance to that class of insecticide. In order to reduce the possibility of horn flies developing resistance, it is important to rotate the class of insecticide used and/or the method of horn fly control on a seasonal basis. For advice concerning current control practices with relation to specific local conditions, consult resources in resistance management programs such as a veterinarian and/or your Cooperative Agricultural Extension Service.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Storage: Store in cool place away from direct sunlight. Opened pouches containing ear tags should be resealed for storage.
Pesticide Disposal: Remove tags before slaughter. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.
