Saber™ Extra Insecticide Ear Tags

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION**

Harmful if swallowed, inhaled, or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Wear rubber or nonpermeable protective gloves when applying or removing tags. Do not breathe vapors. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Avoid contamination of feed or foodstuffs.

ENVIRONMENTAL HAZARDS

Do not apply to any body of water. Do not contaminate water by disposal of used tags. This product is toxic to fish.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of pesticide application.

Dip tag button into disinfectant solution.

FIGURE 3
Press female tag under the clip by depressing lever.

FIGURE 4
Apply through ear between second and third ribs, halfway between ear tip and head.

For optimum control and to minimize development of insect resistance, use two tags per animal (one in each ear). All animals in the herd should be tagged. Apply when flies first appear in the spring. Replace as necessary. Apply with ALLFLEX® Tagging System. Tags remain effective up to 5 months. Remove tags in fall.

Continual exposure of horn flies to a single class of insecticides (eg, pyrethroids or organophosphates) may lead to the development of resistance to that class of insecticides. In order to reduce the possibility of horn fly developing resistance, it is important to rotate the class of insecticide used and/or the method of horn fly control on a seasonal basis. For advice concerning current control practices with relation to specific local conditions, consult resources in resistive management programs and/or your Cooperative Agricultural Extension Service.
