Alternate Label Language for Fabric Refresher Claims ONLY

- Eliminates Odors on Fabrics! **
- Kills (odor causing) (germs)(bacteria) and/or (odor causing) bacteria on fabrics.
- Kills germs and eliminates odors on fabrics - and/or – soft surfaces

ELIMINATES ODORS

Biosol® deodorizes by killing many germs that cause odors. It eliminates odors at their source (and in the air). Ordinary, non-germicidal sprays can't do this. To eliminate odors retained in fabrics, spray on draperies, curtains and upholstered furniture.

Biosol® gets to the source of the odor without heavy perfume. Eliminates damp musty odors in the basement or in areas where air does not circulate.

Optional disinfectancy statements:

Reduces odor-causing germs (bacteria) on soft surfaces such as dog beds, couches, pillows, mattresses, window treatments, carpets and chairs.

Disinfects (Sanitizes) and Deodorizes by Killing common (household) Germs and Controlling Their Odors

Eliminates Odors Caused by (Bacteria) (Germs) (Mildew)

Now the disinfectant spray you have trusted for controlling germs has the added benefit of controlling odors on fabrics. Lysol Brand II Disinfectant Spray Plus Fabric Refresher contains patented odor eliminating technology that removes tough odors, leaving your fabrics smelling clean and fresh. Lysol Brand II Disinfectant Spray Plus Fabric Refresher not only kills odor-causing bacteria, it eliminates odors such as smoke, pet, and cooking odors on a wide variety of fabrics, including Upholstered Furniture, Draperies, Car Interior fabric, Carpeting.

Extinguish any open flames and cigarettes before use and until surface is dry.

To Eliminate Odors from Fabrics: Spray a light mist evenly on fabric. DO NOT SATURATE. Odors start to fade immediately. Let air dry for approximately 15 minutes. For difficult odors or heavier fabrics, repeat application as needed. Safe for virtually all fabrics. **

**Do not use on silk, leather, rayon, acetate or satin (fabrics) [(or) (on) polished wood, painted surfaces, acrylic plastics].

Important: (First) (Always) test a hidden (section) (area) of fabric (or) (area to be treated for soft surfaces).
