Subject: Label Amendment – To revise the product labeling
Product Name: Lysol Brand All Purpose Cleaner
EPA Registration Number: 777-89
Application Date: April 13, 2016
Decision Number: 516605

Dear Ms. DeCarlo:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Page 2 of 2
EPA Reg. No. 777-89
Decision No. 516605

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6.

If you have any questions, please contact Karen M. Leavy by phone at 703-308-6237, or via email at Leavy.Karen@epa.gov.

Sincerely,

Eric Miederhoff

<< LYSOL® AUTOMATIC DISPENSING UNIT - Includes: Dispenser, (product name) Refill and 4 AA batteries >>

Assembly:

1. Open battery door (as shown) then insert 4 AA batteries (included).
2. Close battery door, pressing firmly on the tab to ensure it is fully closed.
3. Remove seal from (product name) refill.
4. Insert (product name) refill into the dispenser until you hear it CLICK into place.
5. Place dispenser on the counter (where you will use it).
6. Turn unit ON using the ON/OFF switch on the back of the dispenser.
7. Wait until the RED indicator light at the front stops blinking. Dispenser is now ready for use.

To Use:

Place (sponge) (cloth) (towel) underneath the nozzle. Ensure (sponge) (cloth) (towel) is placed between the nozzle and the indicator light. You may need to move (sponge) (cloth) (towel) under nozzle several times before first dispense. The dispenser will automatically dispense just the right amount of product on your (sponge) (cloth) (towel).

Replacing the Refill:

Turn OFF the dispenser by using the ON/OFF switch. Press the EJECT button at the back of dispenser and remove the empty bottle. Replace only with (this product) refill. Be sure to remove the seal from (the) refill cap before use.

Replacing the Batteries:

When the batteries have run out, the RED indicator light will flash 6 times. For best results, replace with a new set of 4 AA alkaline batteries.

Maintaining Your Dispenser:

- DO NOT place the dispenser in standing water, under running water or inside the dishwasher. If you do so, the unit may no longer function.
- If the dispenser requires cleaning, switch unit OFF, then wipe dispenser with a damp non-abrasive cloth and dry thoroughly.
- Ensure lens on underside of nozzle is free from product build-up as this may unintentionally activate sensor.
- DO NOT place the dispenser in direct sunlight.

Troubleshooting:

1. If the dispenser does not turn ON:
 - Check that the batteries are inserted in the correct orientation.
 - If the batteries are inserted correctly, the light in front of the dispenser will flash for a few seconds and stop when it is switched ON and ready for use.
2. If the dispenser does not dispense properly OR does not dispense any product at all:
 - Ensure (sponge) (cloth) (towel) is placed between the nozzle and the indicator light (see diagram).
 - Switch dispenser to OFF. Clean as described in the section 'Maintaining Your Dispenser'.
 - Check to see if dispenser is standing in water. If so, the unit may no longer function; however, try removing the battery door, wiping and drying the interior thoroughly, then re-inserting the batteries.
3. If product is dispensing unintentionally, see 'Maintaining Your Dispenser'.

IMPORTANT:

- DO NOT hold the dispenser from the front middle while it is switched ON; as this will activate the sensor and product will be dispensed onto your hand.
- Before cleaning your counter where the dispenser has been placed, turn the dispenser OFF before moving to prevent product from accidentally dispensing.
- Use only (product name) refills in the dispenser.
- Contains batteries. Do not reuse batteries. Batteries contain 0% Mercury / 0% Lead / 0% Cadmium.
