Subject: Label Amendment – To update marketing claims, update language to the use directions, and to add additional graphic icons with revised master label.
Product Name: Brace
EPA Registration Number: 777-99
Application Date: July 10, 2020
Decision Number: 566624

Dear Ms. Natarajan:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false

Page 2 of 2
EPA Reg. No. 777-99
Decision No. 566624

or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6.

If you have any questions, please contact Srinivas Gowda by phone at (703) 308-6354 or via e-mail at gowda.srinivas@epa.gov

Sincerely,

To (Spot) Sanitize Soft Surfaces (Fabrics): Spray until fabric is wet. DO NOT SATURATE. Fabric must remain wet for 30 seconds. Let air dry. For difficult odors, repeat application.

To (Control) (Eliminate) odor-causing Bacteria on Soft Surfaces (Fabrics): Spray until fabric is wet. DO NOT SATURATE. Let air dry. For difficult odors, repeat application. Reapply as necessary.

<< OPTIONAL ADVISORY STATEMENTS >>

Do not use on polished wood, painted surfaces, leather, rayon fabrics, or acrylic plastics.
For other surfaces, spot test in an inconspicuous area.
Do not use on utensils, glasses and dishes.
Does not harm most (bathroom) (restroom) surfaces.
Spray may leave hard floors slippery. Do not concentrate spray over hard floors.

(For Soft Surface (Spot) Application:)
Do not use on silk, rayon acetate or satin fabrics.
Always test on a hidden (section) (area) of fabric.

To assure evacuation of can, avoid tilting more than 45° while spraying. (graphic depicting can being tilted)
To assure evacuation of can, avoid tilting more than 60° while spraying. (graphic depicting can being tilted)

<< Additional USE DIRECTIONS (claim specific) – Specific to Professional Branded products Only >>

For Tuberculocidal Activity: (This product) is effective in (2) (10) minutes at 20°C (68°F) on surfaces that have been thoroughly cleaned prior to application.

(§§) KILLS HUMAN IMMUNODEFICIENCY VIRUS TYPE 1 [HIV-1 AIDS Virus] (and HEPATITIS B VIRUS (HBV)) (HEPATITIS C VIRUS (HCV) ON PRE-CLEANED ENVIRONMENTAL SURFACES / OBJECTS PREVIOUSLY SOILED WITH BLOOD / BODY FLUIDS in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces / objects with blood or body fluids; and in which the surfaces / objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of HIV-1 [associated with AIDS] ((and) Hepatitis B Virus (HBV), (and) Hepatitis C Virus (HCV)).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 ((and) HBV) (and HCV) ON SURFACES / OBJECTS SOILED WITH BLOOD / BODY FLUIDS:

PERSONAL PROTECTION: When handling items soiled with blood or body fluids, use disposable latex gloves, gowns, masks and eye coverings.

CLEANING PROCEDURES: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this product.

CONTACT TIME: Allow surface / object to remain wet for 30 seconds for HIV-1 ((and) HBV), (and HCV). For other organisms surface must remain wet for 3 minutes. (For Mycobacterium bovis BCG surface must remain wet for 6 minutes then allow to air dry) (For (Norovirus), (Hepatitis A Virus), (Adenovirus 2), (Fusarium solani) (and) (Mycobacterium bovis BCG) (Quant tuberculosis) surfaces must remain wet for 10 minutes (then allow to air dry))

DISPOSAL OF INFECTIOUS MATERIALS: Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal.

<< Terminal Sterilant Statement – qualified metal surfaces >>

This product is not for use on critical & semi-critical medical devices or medical equipment surfaces.

<< Terminal Sterilant Statement – unqualified metal surfaces >>

This product is not to be used as a terminal sterilant / high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body; or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enters normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

<< USAGE CLAIMS >>

(§§) (This product) (meets) (is) (compliant with) OSHA Bloodborne Pathogens Standards§§

Special Instructions for Cleaning and Disinfecting areas which may be infested with Hantavirus:

Rodent droppings and visible dust may be reservoirs for Hantavirus. If you are cleaning out a building that has been closed up, such as a cabin, shed, or garage:

1. Air out the building for at least 30 minutes by opening windows and doors.
2. Leave the building while it is airing out.
3. Do not vacuum, sweep or dust. This may spread the Virus through the air.
4. Thoroughly wet the contaminated areas with the product and allow to stand undisturbed for 30 seconds.
5. Carefully remove contaminated material and dispose by burial or burning. Contact your local or state health department for additional disposal methods.
6. Treat the surface again following the label directions and allow to stand undisturbed for 30 seconds.

Veterinary Practice / Kennels / Animal Care Facilities: For disinfecting hard, non-porous surfaces including equipment, utensils, cages, kennels, instruments etc. Remove all animals and feeds from the premises, crates, cages, and enclosures. Remove all litter, droppings, and manure from floors, walls, and surfaces occupied or traversed by animals. Empty all troughs, racks and other feeding / watering appliances. Thoroughly clean surfaces with soap or detergent and rinse with water. Saturate surfaces and allow to stand 3 minutes. Ventilate buildings and other closed spaces. Do not house animals or employ equipment until treatment has been absorbed, set, and dried. Thoroughly scrub all treated feed racks, automatic feeders, and watering appliances with soap or detergent, and rinse with potable water before use.
