6229 S SENTRY IV DOG COLLAR

Sergeant's SENTRY IV DOG COLLAR

WITH THE UNIQUE BRONZE COLOR OF SENGARD

DIRECTIONS: Buckle collar securely but not tightly around dog's neck. COLLAR SHOULD BE WORN LOOSELY. Cut off and dispose of any excess length. Collar will start killing fleas on dog immediately. New fleas temporarily appearing will be killed during four months collar is worn. When bathing dog remove collar until dog is dry. Excessive exposure to water reduces effectiveness. Use the Sentry IV Dog Collar in addition to regular collar. Replace when effectiveness diminishes.

This collar contains Sengard, the A. H. Robins Company's brand of 1,2-dibromo-2,2-dichloro-ethyl dimethyl phosphate. Sengard has a low volatility and slow release of pesticide which makes it longer lasting than 90-day collars. Extensive scientific tests prove that Sengard kills the four most common species of fleas, even hard-to-kill sticktight fleas and should be worn continuously to help reduce heavy flea populations. Ticks are killed more slowly but will usually be dead in 1 to 5 days. Collar will continue to kill American Dog and Rocky Mountain Wood (Spotted Fever) Ticks for 30 days. Dead ticks occasionally remaining in dog's coat are easily detached. For best results, remove hard-to-kill ticks inside ears when collar is put on.

ACTIVE INGREDIENT

1,2-dibromo-2,2-dichloro-ethyl dimethyl phosphate

INERT INGREDIENTS

CAUTION: Do not permit your pet to lick or chew on the collar. If your pet does, wash the area with soap and water. Do not use on cats. Do not use on dogs with open wounds or on the pet's face. Do not use on dogs with open wounds or on the pet's face. Do not use on dogs with open wounds or on the pet's face.

Dead ticks occasionally remaining in dog's coat are easily detached. For best results, remove hard to kill ticks inside ears when collar is put on.

ACTIVE INGREDIENT
Naled (1,2-dibromo-2,2-dichloroethyl dimethyl phosphate) 15.0%
INERT INGREDIENTS 85.0%

CAUTION: Do not open inner envelope until ready to use. Collar is intended for use only as an insecticide generator and is not to be taken internally by man or animals. Even with the Sentry IV Collar, some dogs may be sensitive and may develop neck irritation and loss of hair under the collar if it is worn too tightly. When collar is first worn, observe neck area for irritation every few days. Remove collar if there is evidence of irritation and permit area to heal. Do not use on sick or convalescing dogs. Do not use any other pesticide while collar is worn. Do not use on cats.
