

Sergeant's SENTRY IV DOG COLLAR

Sergeant's SENTRY IV FLEA & TICK COLLAR FOR DOGS

FOR DOGS

This Collar* contains Sengard*, the A. H. Robins Company's brand of 1,2-dibromo-2,2-dichloroethyl dimethyl phosphate. Sengard has a low volatility and slow release of pesticide which makes it longer lasting than 90-day collars. Extensive scientific tests prove that Sengard kills all types of fleas common to dogs, even hard-to-kill sticktight fleas and should be worn continuously to help reduce heavy flea populations. Ticks are killed more slowly but will usually be dead in 1 to 5 days. Collar will continue to aid in tick control for 30 days by killing American Dog and Rocky Mountain Wood (Spotted Fever) Ticks. Dead ticks occasionally remaining in dog's coat are easily detached. For best results, remove hard-to-kill ticks inside ears when Collar is put on.

ACTIVE INGREDIENT:
Naled (1,2-dibromo-2,2-dichloroethyl dimethyl phosphate)

INERT INGREDIENTS:

CAUTION: Do not open inner seal until ready to use. Use only as an insecticide generator and do not breathe fumes. Even with the Sentry IV Collar, some dogs may show irritation and loss of hair under the Collar if it is worn too tightly. When Collar is first worn, observe dog for irritation every few days. Remove Collar if there is evidence of irritation and permit hair to grow. Do not use on sick or convalescing dogs. Do not use any other pesticide while Collar is worn. Do not use on dogs with open wounds.

Sergeant's SENTRY IV DOG COLLAR

Sergeant's SENTRY IV FLEA & TICK COLLAR FOR DOGS

DIRECTIONS: Buckle Collar on dry hair of fully grown dog's neck. COLLAR SHOULD BE WORN LOOSELY. Collar will dispense active ingredient which kills starting fleas on dog immediately. New fleas temporarily appearing will be killed during four months Collar wears. When bathing dog remove Collar and let hair dry. Use the Sentry IV Dog Collar in addition to regular collar. Replace when effectiveness diminishes.

INERT INGREDIENTS
CAUTION: Do not open inner envelope until ready to use. Collar is intended for use only as an insecticide generator and is not to be taken internally by man or animals. Even with the Sentry IV Collar, some dogs may be sensitive and may develop neck irritation and loss of hair under the Collar if it is worn too tightly. When Collar is first worn, observe neck area for irritation every few days. Remove Collar if there is evidence of irritation and permit area to heal. Do not use on sick or convalescing dogs. Do not use any other pesticide while Collar is worn. Do not use on cats.
