Flea & Tick Collar for Small Dogs

Kills fleas and aids in controlling ticks on dogs and new ones picked up from environment for 4 full months. Collar contains a new, sustained release system which works two ways by combining the insecticidal actions of vapor and powder. Thus, Collar has the effect of simultaneous usage of a spray and powder in controlling fleas and ticks. Wetting will not impair Collar's effectiveness. It is not necessary to remove Collar if dog goes swimming or is out in the rain. Use continuously for most effective control.

DIRECTIONS: Place Collar around dog's neck, adjust for fit, and buckle in place. The Collar must be worn loosely to allow for growth of the dog and to permit the Collar to move about the neck. Generally, a properly fitted Collar is one that, when fastened, will snugly slide over dog's head. Leave 2 or 3 inches for extra adjustment. Cut off and dispose of excess length. Wash hands after installing Collar on dog. Replace when effectiveness diminishes. It is a violation of Federal Law to use this product inconsistent with its labeling.

CAUTION: Do not open until ready to use. Collar is intended for external use only on dogs; not to be taken internally. Do not use any other pesticide while Collar is worn. Some animals may become irritated by any collar if it is applied too tightly. If this occurs, loosen Collar. If irritation continues, remove Collar and consult your veterinarian. Do not use on cats.

DISPOSAL: Dispose Of Empty Pouch And Expired Collar In Trash.

For cats, use Sergeant's® Flea & Tick Collar For Cats
