

G. G. D.  
Grace-Lee General Disinfectant

Effective general disinfectant in hospitals, nursing homes, locker rooms and lavatories.

Phenol coefficient against E. Typhosa = 5

Dilute 2 ounces G. G. Disinfectant per gallon of water for disinfecting, cleaning, and deodorizing floors, walls and other hard surfaces. Dilute 1 ounce of G. G. Disinfectant per gallon of water for sanitizing similar surfaces. Allow at least two minutes contact with surface before rinsing. For heavy contamination of soil apply solution twice for more complete protection.

Active ingredients:

Potassium Ortho phenyl phenate	10.0 %
Potassium 4-6-chloro -2 phenyl phenate	1.7%
Pine Oil	2.7%
Potassium soap (anhydrous )	10.0%
Inert ingredients	75.6%

CAUTION: KEEP OUT OF REACH OF CHILDREN. Avoid getting concentrate on skin or in eyes. In case of contact with skin or eyes, flush with plenty of water. If eye irritation persists, get medical attention. Avoid contamination of food.
