PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing dust. Avoid contact with skin, eyes or clothing. In case of contact, immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product through any type of irrigation system.

RE-ENTRY STATEMENT

Do not apply this product in such a manner as to directly or through drift expose workers or other persons. The area being treated must be vacated by unprotected persons. Do not enter treated areas without protective clothing until spray has dried. Because certain states may require more restrictive re-entry intervals for various crops treated with this product, consult your State Department of Agriculture for further information. Written or oral warnings must be given to workers who are expected to be in a treated area or an area about to be treated. Oral warnings must be given if written warnings cannot be understood by workers and must be in a language they understand. Give specific oral warnings which inform workers of areas or fields that may not be entered without specific protective clothing, the period of time field must be vacated, and appropriate actions to take in case of accidental exposure. Written warnings must include the following information: CAUTION. Area treated with ROTEFIVE on (date and time of application). Do not enter

without full protective clothing until sprays have dried.

Do not apply to food crops within one day of harvest.

MIXING AND SPRAYING DIRECTIONS

1. Use 3 level tablespoons per gallon of water (3 lbs. per 100 gallons)
2. Make a thin paste with small amount of water and then add balance of water required.
3. Apply a minimum of 200 gallons of spray per acre every 4 to 7 days until insects are under control. Repeat after rains.
4. For Vegetables and Flowers, apply as per directions given above, for the control of insects listed.
5. For Fruits and Berries, use the above amounts for spraying and apply as per specific directions given for each crop.
