**LILLY MILLER**  
**Chlordane 8E**

READ ALL PRECAUTIONS ON THE CONTAINER BEFORE USING THIS PRODUCT.

**DIRECTIONS FOR USE:**  
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**TERMITES (Subterranean)**  
Use 2 qts. CHLORDANE 8E in 47 1/2 gallons of water (1 cup in 3 gallons of water). This makes a 1% water emulsion.

**TERMITE CONTROL IN EXISTING STRUCTURES**  
Buildings with Basements or Crawl-Spaces

First remove all wood debris and wood forms. Around piers, pipes, chimney bases and along foundations of poured concrete dig a trench 6 inches wide and 4 inches deep. For brick and block foundations dig the trench about 12 inches deep. If footing is more than 12 inches deep make holes with a crowbar, pipe or ax about one foot apart. The holes from the trench bottom to the top of the footing. Make holes deeper in hard packed clay soils. NEVER DIG BELOW THE TOP OF THE FOOTING. Apply the emulsion (or solution) in the trench at a rate of 4 gallons per 10 linear feet per foot of depth. Apply half of this to the back 1/2 of the trench along the inside wall of the basement or crawl space. Cover treated soil with a thin layer of clean soil.

For masonry chimneys and masonry walls or pilings later feet intervals 6 inches from the foundation. Dip out one half gallon of emulsion (or solution) to each hole. (Fill with clean brick)

holes. Slabs with heat ducts or radiating heat pipes should be treated by commercial pest control operator.

The object is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment, particularly if there are inaccessible areas, basements or slab-type construction. It is suggested that you contact the Agricultural Cooperative Extension Service for advice or consult a Commercial Pest Control Service.

Avoid contamination of public and private water supplies by following these precautions. Do not allow a hose or any type of faucet extension to reach into the termite chemical solution while filling or mixing this material with water. Use anti-back-flow or anti-siphonage equipment on all filling equipment. These devices can be purchased at hardware or plumbing supply stores. Use of anti-back-flow equipment will help to insure that the user of this toxic chemical will not contaminate domestic water supplies. Refer to Federal (Federal Housing Administration), state and local specifications for safe distances of treatment areas from wells. Soil in the vicinity of wells, cisterns or ponds should not be treated if it is water saturated, subject to excessive saturation, due to an accumulation of water or if the soil to be treated around the perimeter of the structure is at a grade lower than surrounding yard or property area. If this is the situation treat as follows: Do Not Apply Under Pressure. Soil should be removed to an area safe from well or domestic water contamination, treated, allowed to stand undisturbed for two to four hours then returned to the trench which has been lined with 4 mil plastic sheeting. Be careful not to puncture the plastic sheeting when returning soil to the trench. Do not treat structures that contain cisterns or wells.

**RETREATMENT RESTRICTIONS**  
Retreatment for subterranean termites should only be made when there is evidence of reinfestation subsequent to the initial treatment or there has been a migration of the chemical to the soil. Retreatment should be made as a spot treatment to the areas.

Aerial treatment of the entire premises must be avoided.

LILLY/MILLER  
**Chlordane8E**

ACTIVE INGREDIENTS  
 Chlordane 72.31%  
 Petroleum distillate 21.5%  
 INERT INGREDIENTS 6.2%  
 \*Equivalent to 4.0% octachloro-4,7-methanoanthracene and 28.92% related compounds.

**KEEP OUT OF REACH OF CHILDREN  
 WARNING**  
 See side panel for Statement of Practice, Treatment and additional  
 Precautionary Statements.

## **PRECAUTIONARY STATEMENTS**

### **HAZARD TO HUMANS AND DOMESTIC ANIMALS**

#### **WARNING**

May be fatal if swallowed. Do not breathe vapor, dust, or spray mist. Do not get in eyes, on skin or clothing. In case of skin contact, wash immediately with soap and water. Avoid contamination of feed and foodstuffs.

#### **STATEMENT OF PRACTICAL TREATMENT**

##### **If swallowed**

Call a physician or Poison Control Center immediately. Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.

##### **If inhaled**

Remove victim to fresh air. Apply artificial respiration if indicated.

##### **If on skin**

Remove contaminated clothing and wash affected areas with soap and water.

##### **If in eyes**

Flush eyes with plenty of water. Get medical attention immediately.

#### **ENVIRONMENTAL HAZARD**

This product is toxic to fish, birds and other wildlife. Keep out of lakes, streams and ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

#### **PHYSICAL OR CHEMICAL HAZARDS**

Do not use, pour, spill or store near heat or open flame.
