

Ms. Mary Hewitt
Registration Specialist
The Chas. H. Lilly Company
7737 NE. Killingsworth
Portland, OR 97218

MAR 17 1986

Dear Ms. Hewitt:

Subject: Amendment - Proposed Reentry Text/Label Revision-Update
Lilly/Miller Mosquitocide B-1G
EPA Registration No. 802-336
Your Letter Dated February 5, 1985

The amendment referred to above, submitted in connection with registration under section 3(c)(7)(A) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), is acceptable provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.

2. Make the labeling changes listed below before you release the product for shipment bearing the amended labeling:

- a. Following the product name, the sentence should read, "A Residual Granular Mosquito Larvacide" The word "Granular" has been added.
- b. The Child-Hazard Warning must precede the signal word.
- c. We prefer that the Statement of Practical Treatment follow the signal word on the front panel (refer to sample label).

The Statement of Practical Treatment must also be revised. We suggest the following statement; however, if your toxicological data suggest otherwise, please submit a draft Statement of Practical Treatment for prior approval:

If swallowed - Call a physician or Poison Control Center immediately. Drink one or two glasses of water and induce

vomiting by touching the back of throat with a finger. Do not induce vomiting or give anything by mouth to an unconscious or convulsing person.

If inhaled - Remove victim to fresh air. Apply artificial respiration if indicated.

If on skin - Remove contaminated clothing and wash affected areas with soap and water.

If in eyes - Flush eyes with plenty of water. Call a physician immediately.

Note to Physician - If symptoms of cholinesterase inhibition are present, atropine sulfate is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

- d. We prefer the Precautionary Statements heading at the top of the side or back panel preceding the Directions for Use.
- e. Following the Human Hazard statement add the word "CAUTION," immediately followed by the wording:

Harmful if swallowed, inhaled, or absorbed through the skin. Wash thoroughly with soap and water after handling. Wash clothing with soap and water before reuse. Avoid contamination of feed and foodstuffs.

- f. Revise your Environmental Hazards section to read:

This product is toxic to fish and wildlife. Birds feeding on treated areas may be killed. Shrimp and crab may be killed at application rates stated on this label. Do not apply where these are important resources. Do not apply directly to water, use only in intermittently flooded areas, standing water, temporary rain pools, and log ponds when used for mosquito control only. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label.

This pesticide is highly toxic to bees exposed to direct treatment or to residues remaining on the treated area. Do not apply when bees are actively visiting the crop, cover crop or weeds blooming in the area. Application should be timed to provide the maximum possible interval between treatment and the next period of activity.

- g. Following the "Environmental Hazards" section you should add a "Physical or Chemical Hazards" section. This section should include appropriate statements of physical or chemical hazards, i.e., flammability, reactivity, corrosivity.
- h. The second paragraph under Directions for Use uses the words, "long residual." You must stipulate the amount of time and you must submit data to support that length of time. If there are no supporting data then you must delete the words.
- i. The omission of a reentry statement for this product is acceptable.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

George T. LaRocca
Product Manager (15)
Insecticide-Rodenticide Branch
Registration Division (TS-767C)

Enclosure

MOSQUITOCIDE B-1G

A Residual Mosquito Larvacide Containing 1% Baytex*
For use only by Mosquito Abatement Districts, Public Health
Officials and other trained personnel of Public Mosquito
Control Programs

ACTIVE INGREDIENT:

Fenthion [0, 0-Dimethyl 0-[(4-methylthio)-m-tolyl]
phosphorothioate] * 1%

INERT INGREDIENTS: 99%

Total 100%

*U.S. Patent No. 3,042,703

NET WEIGHT 50 LBS

RECOMMENDATIONS

MOSQUITO LARVAE

1. Use 5 to 10 pounds per acre. Apply
2. Repeat as necessary.
3. Use the higher rate where pools of water are deep in depth.

CAUTION

Keep out of reach of children

PRECAUTIONARY STATEMENTS

STATEMENT OF PRACTICAL TREATMENT

If poisoning occurs, obtain prompt medical aid. Note to Physicians: Sodium sulphate is antidotal.

ACCEPTED COMMENTS
EPA Letter Dated

MAR 17 1986

ENVIRONMENTAL HAZARDS

Birds feeding on treated areas will be killed

DIRECTIONS FOR USE

It is a violation of Federal law to apply this product in a manner inconsistent with its labeling.

Lilly/Miller MOSQUITOCIDE B-2G is recommended for use wherever mosquitoes breed. It provides long residual control and is as effective against Malathion resistant strains as non-resistant strains.

For mosquito larvae control, applications should be made to moist areas, standing water, shallow ponds, and around the edges of larger ponds, lakes, marshes, swamps, and tidal areas. Also apply around and on garbage dumps, manure piles, catch basins and similar areas where mosquitoes breed.

RESTRICTIONS

1. This product is toxic to juvenile shellfish. Do not apply where these are important.
2. Do not use inside homes, in dairy barns, or where food is processed.
3. Do not use on crops used for food or feed.
4. Do not use treated manure on soil where crops are grown.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed. Pesticide disposal: Wastes resulting from this product should be disposed of on site or at an approved waste disposal facility. Container disposal: Completely empty by pouring into a hole or trench. Then dispose of empty bag in a sanitary landfill or by incineration, as allowed by State and local authorities, but never by burning or by open flame.

* BAYTEX is a Reg. TM of the Parent Company, Bayer AG, BmbH, Leverkusen.

Notice: Follow directions carefully. Time of application, weather and crop conditions, mixtures with other pesticides recommended, and other influencing factors are beyond the control of the seller. Buyer assumes responsibility for handling of this material not in strict accordance with the directions herewith.
