SLUG, SNAIL & INSECT KILLER [GRANULES] are ready-to-use and remains effective even after rains and sprinklings. Protects flowers, ornamentals, shrubs and certain listed vegetables.

Be sure area to be baited is damp. In dry weather, water area well before baiting.

Apply bait in evening or at night as these pests feed mainly at night.

Until under control, bait should be renewed every two weeks or more often for heavy infestations.

Slugs and Snails favor dark, damp places. Bait especially well shaded areas around flowers, shrubs, rockeries, and other ornamentals where these pests stay during daylight hours.

Slugs, Snails and the listed insects are attracted to the bait. Place bait upwind to the infestation for best results. Upwind is the direction from which the wind is blowing from bait toward pests.
