GRANULAR NOXALL

For killing plant life and preventing re-growth in Roadways, Driveways, Paths, Patios, Fence Rows, Curb Lines, Parking Areas, Game Areas, around Foundations, Buildings, and similar areas where no plant growth is wanted. Prevents plant growth for one or more years.

DO NOT USE
IN GARDENS,
FLOWER BEDS
or ON LAWNS

CAUTION

Harmful if swallowed. May cause irritation of eyes, nose, throat and skin. Avoid breathing dust. Avoid contact with skin, eyes and clothing. Avoid contamination of feed or food-stuffs. Keep out of reach of children, and pets.

Miller's GRANULAR NOXALL is a non-selective weed killer and is toxic to most vegetation. Confine the treatment to the area where the plants are to be killed. Avoid contact with lawns, perennials, and other desirable plants. Avoid treatment of soil over roots of desirable plants, such as trees, shrubs and vines. Avoid run-off from treated area to desirable plants and lawns. Avoid contamination of irrigation or domestic water.

Destroy empty container. Do not re-use for any purpose.

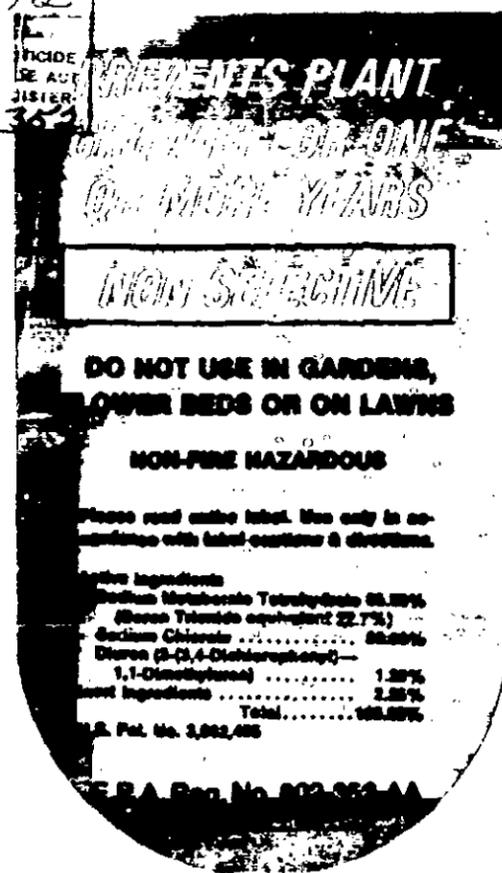

NOTICE: Follow directions carefully. Timing and method of application, weather and crop conditions, mixtures with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given hereon.

DIRECTIONS FOR USE

DRY APPLICATION

Remove push-out portion of shaker cap, then rotate shaker holes so as to allow only the flow of granules that can be spread evenly.

- Moist Soil**—for best results, soil of treated area should be moist at time of application. Rainfall or artificial watering is required to carry the material into the soil before it becomes effective as a root killer.
- Annual Grasses and Weeds**
 - For most effective control, this material should be applied just prior to emergence, or at time when weeds are in seedling stage of growth (1 to 2 inches high).
 - Apply at the rate of 2 pounds per 100 square feet (contents of this package will cover approximately 94 sq. ft.) for seasonal control of most annual weeds and grasses.
- Perennial Grasses and Weeds and for extended control**
 - Apply at the rate of 2 pounds per 50 square feet (contents of this package will cover approximately 47 sq. ft.).
 - Apply to damp soil, preferably at a time when there will be enough expected rainfall to adequately carry the material into the root zone.
- Retreat persistent or spot re-growth as necessary to maintain desired control.
