MILLER'S  
ALPHASPRAY 200

ACTIVE INGREDIENT

*1-Naphthaleneacetic acid, Potassium Salt	6.23
INERT INGREDIENTS	93.77
TOTAL	100.00

\*1-Naphthaleneacetic Acid equivalent 5.17% or 200 grams  
per gallon.

A Hormone-like Spray Concentrate containing 200 grams  
1-Naphthaleneacetic acid equivalent per gallon

USED TO REDUCE PREHARVEST DROP OF APPLES AND PEARS  
AND TO DELAY LEAF DROP OF CUT HOLLY

KEEP OUT OF REACH OF CHILDREN  
CAUTION  
See back panel for additional precautionary statements.

#### Miller's ALPHASPRA 200

Miller's ALPHASPRA 200 is used to reduce pre-harvest drop of certain varieties of Apples and Pears and to delay leaf drop on cut Holly.

#### APPLES AND PEARS - Application Directions

Consult State Agricultural Experiment Station or State Extension Service Authorities for correct timing of application on Apples and Pears

Spray trees thoroughly, wetting all fruit stems and adjacent leaves. Apply to Apples 7 to 14 days before harvest and to Pears 6 to 7 days before harvest. Do not spray within 5 days of harvest. Do not make more than 2 applications and do not delay picking beyond optimum maturity.

#### APPLES AND PEARS - Dilution of spraying with ground equipment

Apples - Mix at the rate of 4.8 fl. oz. per 100 gallons of water (3/4 pt. per 250 gals.) to prepare a 20 ppm spray solution.

Pears - Mix at the rate of 2.4 fl. oz. per 100 gallons of water (6 fl. oz. per 250 gals.) to prepare a 10 ppm spray solution.

Thoroughly cover trees with appropriate spray, using up to 465 gallons per acre on Apples of the 20 ppm spray solution which provides a naphthaleneacetic acid equivalent of 35 grams per acre. Use up to 670 gallons of 10 ppm spray per acre for Pears which provides 25 grams of naphthaleneacetic acid equivalent per acre.

#### HOLLY - to delay leaf drop

Use 1 to 2 cupsful to 100 gallons of water (equals 33 to 66 ppm). Dip holly soon after cutting; do not soak; drain off excess solution. Pack before Holly dries with sufficient moisture to keep Holly fresh until it reaches destination. Ship immediately or store at 34 to 40° F. Keep solution as clean as possible. Renew dip with fresh solution as it is used up. Do not keep solution longer than 3 to 4 days.
