DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For household use only.

Wearing household latex or rubber gloves, use a dust applicator such as a shaker can, dust gun, puffer or other bulbous duster, rotary duster or other appropriate duster as available. Dust lightly to cover both upper and lower leaf surfaces with a thin, even film of dust.

Apply when air is calm to avoid drift and contact with eyes and skin.

Start applying at the farthest corner of the treatment area and work backward to avoid contact with dusted surfaces. Allow dust to settle in treated areas before reentering.

For plants above chest height, consider using a liquid carbaryl product.

Do not repeat application more than once a week.

Dust lightly on first appearance of insects or insect damage.

Make complete coverage of all pests and all parts of plants especially upper and lower leaf surfaces.

Observe the number of days before harvest for last application noted by each crop (for instance on cabbage, broccoli, brussels sprouts, cauliflower and kohlrabi, you may apply this dust up to 3 days before picking or harvest).

Subsequent planting of food and feed crops in treated soil must be made with crops on this or other carbaryl label(s).

VEGETABLES

BEANS (day of harvest) — for control of Flea Beetles, Mexican Bean Beetles, Leafhoppers, Cucumber Beetles, Western Bean Cutworms.
