### WHAT IS THIS PRODUCT? AND WHAT WILL IT DO?

Lawn Weed Killer will kill even the worst lawn weeds — roots and all — without harming the grass.

For lawns containing bentgrass, use the special rate on the chart inside. In California and the Southwest, do not use this product on dichondra, St. Augustinegrass, bahia grass, centipedegrass, carpetgrass, bermudagrass, buffalograss or Zoysia lawns.

**LAWN WEED KILLER will kill all these weeds, plus many more:**

Bedstraw	Dock	Peppergrass	Spurge
Bindweed	Ground Ivy	Pigweed	Thistle
Buckhorn	Healall	Plantains	Lawn Violet
Burdock	Herbit	Poison Ivy	Wild Carrot
Buttercup	Knotweed	Poison Oak	Wild Garlic
Chickory	Lambsquarter	Ragweed	Wild Lettuce
Clover	Mallow	Sheep Sorrel	Wild Onion
Cranesbill	Morningglory	Speedwell	Yarrow
Dandelion	Pearwort		

**Even these hard to kill weeds:**

Chickweeds	Japanese Clover	Purslane
English Daisy	(Black Medic)	Red Sorrel
False Dandelion	Oxalis	

### HOW DO I USE THIS PRODUCT?

**When To Use:** Spray any time weeds are actively growing — Spring and Fall are the best. Do not spray when temperatures will go above 85° F or when rain is expected within 24 hours.

**What To Do:** Spray the lawn evenly, using a coarse droplet spray. Wait for 24 hours after spraying to water the lawn. Continue to water and feed the lawn to help fill in places where weeds have died. After 4 weeks, you may re-seed any remaining bare areas.

**What Not To Do:** Do not allow spray mist to drift onto vegetables, flowers, ornamental shrubs and trees, small fruits, fruit trees, or any other desirable plants. They will be damaged. Do not water the lawn for 24 hours after spraying. Do not spray LAWN WEED KILLER in areas where shrub or tree roots may be located. KEEP FROM FREEZING.

### Mixing and Measuring—Shake Well Before Using

It's a good idea to have a separate sprayer just for weed killers to avoid mix-ups.

Amount of Lawn Weed Killer	Fill to this level with water (gallons)	Spray to cover (square feet)
<b>Hose-end Sprayers—Use a hose-end sprayer designed for lawns.</b>		
2 Tbsp. (1 fl. oz.)	1	300 (15' x 20')
1 1/4 cups (10 fl. oz.)	10	3000 (50' x 60')
<b>Tank Sprayer—Use a spray pattern which gives small droplets without fine mist. Over-pumping the sprayer will make a fine mist.</b>		
2 Tbsp. (1 fl. oz.)	1	300 (15' x 20')
6 Tbsp. (3 fl. oz.)	3	900 (30' x 30')
<b>New lawns and lawns containing Bentgrass—This is a special concentration; use it until grass has thickened up (6–8 weeks after seed has come up).</b>		
1 Tbsp. (1/2 fl. oz.)	1	200 (10' x 20')
<b>'Spot' Spray—To spray individual weeds, use any type of tank or trigger sprayer. Do not use a hose-end sprayer.</b>		
4 Tbsp. (2 fl. oz.)	1	Wet each weed

### WHAT WILL I SEE?

Within 10 days you will see the leaves begin to curl and twist. Weeds will gradually die, taking several weeks to completely disappear.

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION:** Harmful if swallowed. Avoid breathing spray mist. Avoid contact with skin, eyes or clothing. When handling this product, wear chemical resistant gloves. Wear long pants, long-sleeved shirt, socks, shoes, gloves, face shield or goggles when mixing, loading or applying this product. In case of contact, immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists. After using this product, rinse gloves before removing, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water. Remove saturated clothing as soon as possible and shower. Do not allow people (other than applicator) or pets on treatment area during application. Do not reenter or permit others to reenter treated areas until sprays have dried.

### ENVIRONMENTAL HAZARDS

Do not apply when weather conditions favor drift from target area. This product is toxic to aquatic invertebrates. Drift or runoff may adversely affect aquatic invertebrates and nontarget plants. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters. When cleaning equipment, do not pour the washwater on the ground; spray or drain over a large area away from wells and other water sources. Most cases of groundwater contamination involving phenoxy herbicides such as 2,4-D and MCPP have been associated with mixing/loading and disposal sites. Caution should be exercised when handling 2,4-D and MCPP pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing and transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.
