**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Apply 50 lbs. to 6,250 sq. ft.

Apply any time weeds are growing actively-spring, summer or fall. Applications to moist foliage and soil, when temperature is between 50 degrees and 80 degrees F., are the most effective. Applications during hot weather (over 90 degrees F.) or on dry soil may cause some temporary damage to turf.

1. Do not apply to a new lawn. Wait until lawn is 3 months old.
2. Do not mow lawn for two days prior to application so as to have sufficient weed foliage to receive weed killers.
3. Apply to moist soil and foliage using an accurate spreader and correct dial setting from the chart below.
4. Do not water lawn for 24 hours after application. Resume watering, if needed, after 24 hours.
5. Make second application after one month if control of hard-to-kill weeds is not complete.

Rinse spreader with clear water after use.
