Lilly's Go-West Meal

Kills Slugs & Snails

Strawberry Root Weevils, Cutworms, Earwigs, Sowbugs

#### EFFECTIVE DESTROYER OF SLUGS AND SNAILS

Contains aromatic sweet apple pulp impregnated with highly effective pest control chemicals. Since the poisons are an integral part of the bait and not merely mixed together, Go-West Meal will remain effective longer than ordinary ground meals and will resist washing away by rain and watering. Since Go-West is a multi-purpose product designed to control strawberry root weevils, cutworms, earwigs and sowbugs in addition to slugs and snails, it saves you time and money.

Be sure to begin baiting early for slugs and continue baiting even in the fall when you might normally forget.

#### WARRANTY:

The use of this material being subject to conditions beyond our knowledge and control, the seller makes no warranty of any kind, express or implied, concerning the effects of this product whether or not used in accordance with directions.

Lilly's Go-West Meal

Sweet Apple Base

KILLS all these garden pests

Slugs      Strawberry root weevil      Earwigs

Sowbugs      Cutworms      Snails

SLUGS AND SNAILS: Since these pests feed on your plants at night and are not generally seen during the day you may not realize you have an infestation unless you are able to recognize slug damage. For best results begin applications early in the year. Apply by the broadcast method using 1 lb. of Lilly's Go-West Meal to 250 sq. ft. of area. Re-apply at two week intervals as long as slugs are present. The aroma of the sweet apple base and metaldehyde will attract slugs from a surprising distance. Moist soil increases effectiveness. Begin baiting program as early as February before slugs fatten up on your valuable plants. For effective control of slug eggs, use Lilly's LIQUID GO-WEST slug killer.

EARWIGS - CUTWORMS - STRAWBERRY ROOT WEEVILS - SOWBUGS : These damaging pests can be controlled by broadcasting Go-West Meal on the ground where insects are seen or damage to plants is noted. Begin baiting for these insects in April.
