FOR ROOT MAGGOT CONTROL

IN DIRECT SEEDED CROPS: Apply only at seeding. Do not make more than one application per season.

Broccoli, Brussels Sprouts, Cabbage, Cauliflower, Rutabagas*, Chinese Cabbage, Turnips*: Use 1 to 2 pounds of product per 100 linear feet of row by placing over the seed in a 2 to 4 inch wide band at time of planting. Sprinkle or irrigate with water after planting.

*With Rutabagas and Turnips, it would be realistic to expect only early season protection because of their extended growing season.

Restrictions: Do not apply more than 1 pound of DURSBAN INSECT GRANULES per 100 sq. ft. Do not use rutabaga tops for food or feed purposes.

Radishes: Use 9.9 ounces of product per 100 linear feet of row by application in the seed furrow with the seed at planting time.

Restriction: Do not apply more than 1 pound of DURSBAN INSECT GRANULES per 80 sq. ft.

1 cup of DURSBAN INSECT GRANULES equals approximately 4 ounces.
