

LILLY/MILLER
GRANULAR NOXALL VEGETATION CONTROL

Prevents Plant Growth For Up To One Year
Non-Selective
Covers up to 1,000 square feet

ACTIVE INGREDIENTS:

Sodium Metaborate Tetrahydrate (Na2B2O4 4H2O)	68.0%
Sodium Chlorate (NaClO3)	30.0%
INERT INGREDIENTS	2.0%

Keep out of reach of children
DANGER
See back panel for additional precautionary statements

NET WEIGHT 10 LBS.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed. Do not get in eyes or on clothing. Wear eye protection when handling. Wash thoroughly after handling. Remove contaminated clothing and wash before reuse. Avoid breathing dust.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Drink promptly a large quantity of milk, egg white and gelatin solution, or, if these are not available, drink large quantities of water. Avoid alcohol. If In Eyes: Hold eye open and wash with steady gentle streams of water for 15 minutes. Get medical attention. If On Skin: Wash with soap and water. Get medical attention if irritation persists. NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

ENVIRONMENTAL HAZARDS

Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters.

STORAGE AND DISPOSAL

Store this product in its original container and keep in a locked storage area out of reach of children and domestic animals. Do not reuse container. Securely wrap container in several layers of newspaper and discard in trash.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For household use only.

What is this product? And what will it do?

Use GRANULAR NOXALL VEGETATION KILLER in places you don't want anything to grow; such as driveways, gravel parking areas, walkways and paths, along fences, around buildings, and under decks. It kills weeds and grass and keeps them from coming back for up to one year.

How do I use this product?

When to use: Spring and fall are the best times to use GRANULAR NOXALL VEGETATION KILLER; but it can be used any time of year as long as the soil is moist down several inches. Soil moisture is the key to good weed control.

What to do: Be sure the soil is moist down several inches. If possible, remove growing weeds and apply this product to bare soil. If this is not possible, mow weeds to less than two inches high.

Scatter the granules evenly over the area. When using a broadcast spreader, do not allow the granules to fly into grass areas or ornamental plantings. They will be damaged.

Gently water the treated area after application, do not flood. In places with compacted soil, water may not easily penetrate. If water begins to puddle on the surface, stop sprinkling and wait until water has gone into the ground. Granules will completely dissolve with additional rain or waterings. Do not allow children or pets into the treated area until granules have dissolved and surface has dried.

What not to do: Do not use this product if you will want anything to grow in the area for about one year. Do not use on slopes. Do not allow granules to get into the lawn, into vegetable gardens, or around flowers, shrubs and trees. They will be damaged. When watering, do not allow water to wash granules into areas with growing plants. Do not use this product in areas where shrub or tree roots may be located.

Measuring and Applying -

On areas of bare soil or with few weeds: Use 1 to 2 cups of GRANULAR NOXALL VEGETATION KILLER per 100 square feet (10'x 10'). Sprinkle the granules evenly over the area. See the illustrations.

On areas with lots of weeds: Use 2 to 4 cups of GRANULAR NOXALL VEGETATION KILLER per 100 square feet (10'x 10'). Sprinkle the granules evenly over the area. See the illustrations.

For hard-to-kill weeds such as thistle, quackgrass, bindweed, Johnsongrass, and other deep-rooted weeds: Use 4 cups to 8 cups of GRANULAR NOXALL VEGETATION KILLER per 100 square feet (10'x 10').

ILLUSTRATIONS

BEST AVAILABLE COPY

Use these illustrations as a guide only. Measure your area to be sure you are putting on the correct amount of product per square foot.

1 cup of GRANULAR NOXALL VEGETATION KILLER spread evenly over 100 square feet looks like this:

4 cups of GRANULAR NOXALL VEGETATION KILLER spread evenly over 100 square feet looks like this:

What will I see?

If you use GRANULAR NOXALL VEGETATION KILLER on bare soil you will not see anything. No weeds or grass will come up for about a year.

If GRANULAR NOXALL VEGETATION KILLER is used on a weedy area, the weeds and grass will begin to turn yellow after a few days. They will turn brown and die over the next few weeks.

Filled by weight not by volume. Product may settle after packaging.

NOTICE: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling when such use and/or handling is contrary to label instructions.
