HOW TO APPLY: HOSE 'N GO WEED & GRASS PREVENTER will not kill existing weeds. Before applying HOSE 'N GO WEED & GRASS PREVENTER, remove any weeds, grass, fallen leaves and other plant debris. Rake area smooth, if necessary. HOSE 'N GO WEED & GRASS PREVENTER will cover 1000 sq. ft. of established annual and perennial flower beds, ground covers, ornamental beds, gravel walkways, driveways, etc.

Over application can cause damage to shrubs, trees and groundcovers. Do not apply to steep areas where runoff is possible. Do not use on dichondra or turfgrasses. Do not plant grass or shallow-rooted flowers and groundcovers (less than 4") in treated areas for 4 months following treatment. To prevent weed growth from occurring, do not disturb surface after treatment. Do not apply to or around vegetables.

To prevent staining avoid application to fences, sidewalks, patios, cement blocks, stucco or painted surfaces. If these surfaces are accidentally sprayed, hose off with water. May stain clothing.

BEST AVAILABLE COPY

SHAKE WELL BEFORE USING.

1. Connect spray nozzle to garden hose. Be sure valve is in "off" position.
2. Remove bottle cap and screw bottle onto nozzle. Turn on water.
3. Switch valve to "on" position to start flow of water. Use valve to shut off flow of water at any time.
4. Spray directly over area requiring application evenly and uniformly.
5. After application, turn on sprinkler or irrigation system for about 1 hour. Do not allow material to run off treated area.

DIRECTIONS FOR USE (Version B)

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For household use only.

What is this product? And what will it do?

Hose 'n Go Weed & Grass Preventer is the easy way to have beautiful, weed-free flower beds all year round. Once you've cleaned out the weeds and grass already growing around your flowers, shrubs and trees, Hose 'n Go Weed & Grass Preventer keeps them from coming back. And it lasts up to 4 months!

Now you can plant your zinnias or pansies or marigolds, spray with Hose 'n Go Weed & Grass Preventer, then sit back and watch them grow. No more hands-and-knees weeding for you.

This easy-to-use container attaches right to your garden hose, so there's no mixing. Use only what you need, then put it away for next time. When the container is empty, simply throw it away.

How do I use this product?

When to use: For established beds and borders, you can use Hose 'n Go Weed & Grass Preventer anytime throughout the growing season. But, the area must be free of weeds and grass, before you spray. Re-spray every 3 to 4 months to keep the areas free of weeds.

Newly-planted flowers, shrubs or trees have to settle in. Wait 1 to 2 weeks after planting before using Hose 'n Go Weed & Grass Preventer. After that, respray every 3 to 4 months to keep the area weed free.

What to do: Shake well before using. Hose 'n Go Weed & Grass Preventer won't work on the weeds and grasses already growing. So, you have to remove them before you get started. Spray them with Lilly/Miller Knock-Out Weed & Grass Killer or pull them cut by hand.

BEST AVAILABLE COPY

When you are finished preparing the area, you can spray.

How to use this sprayer: Shake the container well before getting started. Attach the bottle of Hose 'n Go Weed & Grass Preventer to your garden hose. Be sure the red ON/OFF knob is in the OFF position. Turn on the water from the faucet. When you are ready to spray, turn the blue knob so the triangle mark points at the triangle on the spray head. Push it in. Turn the red knob one-quarter turn counter-clockwise and begin spraying.

To stop spraying at any time, turn the red knob back to the OFF position. When you are finished with the job, push the blue knob out from the back side of the spray head and turn it so the triangle points away from the mark on the spray head. This will prevent the container from leaking.

Spray Hose 'n Go Weed & Grass Preventer evenly over the soil and the plants (yes, right over the top of the leaves), but avoid areas where bulbs are planted. The orange color lets you see where you have sprayed and prevents skips or overlaps. This whole bottle will cover 1,000 sq. ft. (20'x 50'). One quarter of the bottle (see markings on the side) will cover 250 sq. ft. (10'x 25' or a border 5'x 50'). Water the area with clear water for about 1/2 hour after treating.

For barkdust areas or other mulch covers: Wet the area well with clear water before spraying with Hose 'n Go Weed & Grass Preventer. Water again afterwards.

What not to do: Do not use Hose 'n Go Weed & Grass Preventer around vegetables, fruits or other edible plants. Do not use on lawns or dichondra. Do not treat steep areas, where product may move downhill. Do not use over newly planted ice plant. Wait several weeks, until ice plant is well rooted, before applying Hose 'n Go Weed & Grass Preventer.

Do not use this product around these plants; they will be damaged: Douglas Fir, Techny arborvitae, Eastern (Canada) hemlock, or Slender deutzia.

Once an area is treated, do not dig in or otherwise disturb the soil surface. Weeds may pop up. Do not plant seeds, seedlings or other shallow rooted plants in a treated area until 4 months have passed. They may be damaged.

Hose 'n Go Weed & Grass Preventer is orange in color. It will stain paint, stucco, wood, cement, brick, clothing and many other surfaces around the house. Do not allow this product to contact any of these. Do not allow adults, children or pets back onto the sprayed area until it has dried.
