Redroot pigweed	Strawberry, India	Wild buckwheat	And other
Redstem filaree	mock	Wild carrot	broadleaf weeds
Rough cinquefoil	Tall nettle	Wild four-o'clock	
Rough fleabane	Tall vervain	Wild garlic	

HOW DO I USE THIS PRODUCT?
 When to use: You will get better results if you spray when the temperatures are warm and the lawn is well watered. Pick a day when rain is not expected for at least 24 hours. For new lawns, wait until the grass has been mowed 2 or 3 times and is over 2 inches tall before trying to kill the weeds.

What to do: Water the lawn well 1 to 2 days before you spray.

HOW TO USE THIS SPRAYER

1. Before you start, the small, scalloped knob should have the flat part facing forward. If it is not, push it out from the other side and rotate it to the front. The ON/OFF knob should be in the OFF position.
2. Shake the container well and attach it to your garden hose.
3. Turn on the water from the faucet.

When you are ready to spray

4. When you are ready to spray, turn the scalloped knob so that the scallop is forward and push it in.
5. Turn the ON/OFF knob one-quarter turn forward and begin spraying.
6. When you are finished spraying or if you have to stop spraying at any time, turn the ON/OFF knob back to the OFF position.
7. Push the scalloped knob out from the opposite side and turn it so that the flat surface faces forward. This seals the container.
8. Turn off the water from the faucet.
9. Turn the ON/OFF knob ON then OFF to relieve pressure from the hose.
10. Unhook the container from the hose and store it carefully.

Spray this whole bottle over 5,000 sq. ft. (50' x 100'). One quarter of the bottle (see markings on the side) will cover about 1,250 sq. ft. (25' x 50'). Let the spray dry before you let adults, children or pets onto the lawn.

Wait for 24 hours after you spray, before watering the lawn. Then continue to water the lawn as needed. After 4 weeks, you may re-seed any bare spots where weeds have died.

What not to do: Do not use this product on your lawn more than two times in one year. Do not allow spray mist to drift onto vegetables, fruits, flowers, ornamental shrubs and trees, or any other desirable plants. They will be damaged. Do not water the lawn for 24 hours after spraying. Do not spray HOSE 'N GO® WEED & FEED in areas where shrub or tree roots may be located, or within the drip-line.

Do not use this product on newly seeded lawns or on carpetgrass, dichondra, St. Augustinegrass, Centipedegrass, closely cut bentgrass, or clover lawns or turf. Do not spray when it is over 85 degrees. Do not reseed or overseed the area for 4 weeks.

WHAT WILL I SEE?
 Within 10 days you will see the leaves begin to curl and twist. Weeds will gradually die, taking several weeks to completely disappear. In cool or very hot weather, weeds may die more slowly.

STORAGE AND DISPOSAL
 Keep from freezing. Store this product in its original container out of reach of children and domestic animals. Do not reuse container. Rinse thoroughly before discarding and securely wrap original container in several layers of newspaper and discard in trash.

GUARANTEED FERTILIZER ANALYSIS
 Total Nitrogen (N) 15%
 15% Urea Nitrogen
 Derived from Urea.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Harmful if swallowed. Avoid contact with eyes, skin or clothing. When using this product, wear goggles, long-sleeved shirt, long pants, socks, shoes and chemical resistant gloves. In case of contact, immediately flush eyes or skin with plenty of water. After using this product, rinse gloves before removing, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water. Remove saturated clothing as soon as possible and shower. Avoid contamination of food or feedstuffs. Do not allow people (other than applicator) or pets on treatment area during application. Do not reenter or permit others to reenter treated areas until sprays have dried.

STATEMENT OF PRACTICAL TREATMENT: In case of contact, wash skin with plenty of soap and water, for eyes, flush with water for 15 minutes and get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to aquatic invertebrates. Drift or runoff may adversely affect aquatic invertebrates and nontarget plants. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters.

NOTICE: Seller makes no warranty, express or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
