DIRECTIONS: Moles — Locate main runways by either rolling the turf or tamping the runways. Runways that are opened within 24 hours are the main runways. At intervals of 8 to 10 feet, insert a probing stick and drop in 4 or 5 pellets. Close the openings by covering with a piece of sod, a stone or other means so as to disturb the tunnel as little as possible, yet seal out the light.

Pocket Gophers: With the aid of a long handled spoon, remove a soft earth plug, exposing underground at a fresh mound of soil. Using the long-handled spoon, introduce the bait as far down as possible, then tamp the soil back. Being careful not to allow bait to remain on the ba
