FERTILIZER
18-5-9
with Herbicide (Benefin)

HOW TO USE

1. This product fertilizes grass and controls smooth and hairy crabgrass, goosegrass, barnyardgrass, green and yellow foxtail and annual bluegrass on established turf of Bluegrass, Ryegrass, Fescue, Bahiagrass, Bermudagrass, Centipedegrass, St. Augustinegrass, and Zoysiagrass.
2. Do not apply in the spring to bluegrass planted the previous fall. Do not apply to newly sprigged areas until root growth is established. Do not apply to bentgrass, Dichondra, clover lawns or putting greens as possible injury may result.
3. Apply this product in early spring prior to weed grass germination at the rate of 245# (3# actual benefin) per acre. An early fall application is also effective for control of poa annua (annual bluegrass) at the same rate.
4. Reseeding should be delayed approximately 90 days after using benefin.

CAUTION

May cause irritation of eyes, nose, throat, and skin. In case of contact with skin or eyes, flush with plenty of water; for eyes get medical attention.

This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not contribute to water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

Avoid contamination of foods and feeds. Wash thoroughly with soap and water after use.

Do not use as a fertilizer. Do not use
