Ferbam Dust

A protective fungicide for the control of

Blue Mold

in tobacco plant beds

ACTIVE INGREDIENTS: Perbam (ferric dimethyl dithiocarbamate) INERT INGREDIENTS 88.60% 100.00%

Begin applications when plants are about the size of a dime. Apply at 3-day intervals, until plants are set in the field. Make 2 to 31/2 lbs. (per 100 square yards of bed) applications depending on the size and spacing of the plants. Repeat applications following rains. When Blue Mold is detected in the bed increase application frequency to 3 times per week.

Thoroughness of application is essential for Blue Mold control. Plants should be inspected after dusting to confirm thoroughness of coverage. May cause injury to tender plants especially from application is uneven or when foliage is damp. Control of Bree May may not be satisfactory during periods of heavy rainfall, we case infesta-tions are extremely severe, or when applications are uneven, inadequate, or poorly timed.

This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not apply when conditions favor drift from areas treated. Apply this product only as specified on this label. Do not contaminate water by cleaning of equipment or disposal of wastes.

Keep Out of Reach of Children

CAUTION! May cause irritation of eyes, nose, throat and skin. Avoid breathing dust. Avoid contact with eyes, skin or clothing. In case of contact, flush with plenty of water; for eyes get medical attention. Keep dust dry. Store in a safe dry place. Keep away from fire and sparks.

Buyer assumes all risks of use, storage, or handling not in strict accordance with the precautions and directions given herewith.
