

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its label. Except where otherwise indicated on this label, applications may be made up to one day of harvest. For small quantities, mix 5 tablespoonsfuls in 3 gallons of water. Apply with continuous agitation. Compatible with Captan, Discon, Dyrene, Karathane, Maneb, Phosan, Sulfur and In-Basic Copper. Not compatible with oils, lime sulfur or alkaline materials. Mixtures with materials not indicated as compatible and mixtures of three or more materials should be used only when such use is known to be safe by prior experience. Do not exceed maximum dosage. Before applying, consult proper State Extension authority to determine if local recommendations are consistent with this label. This product may injure tender plant parts, particularly when applications are uneven or when plants are wet or when applications are made during periods of sustained high humidity.

APPLES (Southeast): As alternate insecticide, use 5 tablespoonsfuls in 3 gals. of water in the sixth and later cover sprays to control apple maggot, codling moth, Japanese beetle, Oriental fruit moth and red banded leafroller. To avoid thinning, do not use within 30 days of full petal fall. Maggots populations may increase with Sevin usage. Do not apply to apples within one day of harvest. Application should be made with prior experience and local recommendations. Give any application from the 14 to 21 days after full bloom when large fruitlets are the diameter of a dime. Early maturing varieties, use 2½ tablespoonsfuls to 3 gallons of water. This includes Comice, Grimes, Jonathan, McIntosh, Rome, Red Delicious and Winesap. For less maturing varieties, use 5 tablespoonsfuls in 3 gallons of water. This includes Baldwin, Best Davis, Early McIntosh, Golden Delicious, Wealthy, Northern Spy, Rhode Island Greening, Yellow Transparent and York Imperial. **NOTE:** Sevin may injure Early Dawn and Sunrise varieties on Delaware peninsula.

CORN: Add 5 tablespoonsfuls to 3 gallons of water for 800 sq. ft. of corn as a directed spray. For corn earworm, fall armyworm and soy beetle in silks and ears, spray to cover ears and silks at 2 day intervals from time this appear until silk have dried. For budworms, direct spray to whorls when needed before tasseling. Application of this product to the tassel region of corn during the pollen shed period will seriously reduce bee populations.

LAWNS AND TURF: Use 4 tablespoons in 3 gallons of water to cover 100 sq. ft. lbs. in 50 gallons of water per 250 sq. ft. of established lawn to control fall armyworm and webworm, earwigs and mole crickets. Repeat applications as necessary.

The following dosages are indicated in 1 tablespoonfuls of Sevin® 50W in 3 gallons of water to be applied to an area of approximately 1300 sq. ft.

BEANS: For Mexican bean beetle control, use 5 tablespoonsfuls. Use 7½ tablespoonsfuls to control corn earworm and Japanese beetle. Apply to foliage as needed to maintain control.

COMPOST: Use 5 tablespoonsfuls to control armyworm. Do not use within 3 days of harvest.

ALFALFA, CLOVER, GRASS (forage and pasture): Use 5 tablespoonsfuls to control armyworms. Do not use on alfalfa within 3 days of harvest.

WARNING

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Call a physician immediately. Induce vomiting immediately. To induce vomiting, give one or two glasses of water and insert finger in back of throat. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.

IF INHALED: Remove victim to fresh air. Apply respiration if indicated.

IF ON SKIN: Wash promptly with soap and water. Rinse thoroughly.

IF IN EYES: Flush eyes thoroughly with water for at least 15 minutes. Call a physician immediately.

NOTE TO PHYSICIAN: Atropine sulfate is antidote.

PRECAUTIONARY STATEMENTS

HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. Avoid breathing spray mist. Avoid contact with eyes, skin, or clothing. Wash thoroughly after handling.

ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to aquatic and estuarine invertebrates. Do not apply directly to water or wetlands. Do not contaminate water by cleaning of equipment or disposal of wastes. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

GRAPES: To control grape berry moth, grape leafhopper, Japanese beetle, 7½ tablespoonsfuls in 3 gallons of water. Make first application just after bloom, third 10 days later and thereafter apply at 2 week intervals.

PORCIES, TOMATOES, PEPPER, CUCUMBERS AND EGGPLANT: To control tomato fruitworm, stink bugs and Colorado potato beetle, apply 7½ to 10 oz. per acre.

STRAWBERRIES: Use 10 tablespoonsfuls in 3 gallons of water as need.

STRAWBERRY LEAF ROLLER AND STRAWBERRY WEED: For straberry leaf roller, apply 1 oz. per acre.

HYDRANGEA, AZALEA, ELIM, MAPLE, BIRCH AND DOGWOOD: Do not apply more than 10 tablespoonsfuls in 3 gallons of water as needed to control bagworm, box leaf miners, elm leaf beetles, Japanese beetles and June beetles adults.

NOTE: Subsequent planting of food and feed crops in treated soil or other carbaryl laden soil.

Do not contaminate water, food or feed by storage and disposal.
STORAGE: Store pesticide in the original container in a locked storeroom. To dispose of excess pesticide, securely wrap original container and discard in trash. **CONTAINER DISPOSAL:** Do not reuse containers; discarding in trash.

ACCEPTED

DEC 5 1991

Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under such Act,
EPA Reg. No. 829-142

rea Apnia Pea Weevil	2/3 to 1-1/3 quarts per acre	Make applications when insects appear or feeding is noticed.
<p>Use only on peas to be harvested by combine. Do not feed treated vines or threshings to livestock or allow livestock to graze in treated fields. Do not make more than 2 applications per year. Do not exceed a maximum of 1.5 lbs. active ingredient (i.e., 2 quarts) per acre per year.</p>		

PECANS

Insects Controlled	Rate of Application	Method of Application
Black Pecan Aphid Pecan Nut Casebearer Spittlebug	1 quart to 100 gallons	Make applications when insects appear or feeding is noticed. For Casebearer, apply when eggs of first generation appear on the tips of the young nuts. Another application may be required after the second generation of eggs is deposited. For Spittlebug, apply when first leaves are half grown and repeat as required.
Pecan Leaf Phylloxera	2/3 to 1 quart per 100 gallons	Apply when nymphs appear and before they are enclosed in plant tissue. For high populations, use the higher rate.
<p>Do not apply after shuck split. Do not graze livestock on orchard crops or grasses in treated areas. Do not make more than 2 applications per year. Do not exceed a maximum of 3.0 lbs. active ingredient (i.e., 4 quarts) per acre per year.</p>
