

APPLICATION METHODS FOR USE

1. Refer to the label on the container for directions.
2. ESTABLISHED LAWN—For established lawns, apply Agrico Pre-Emergence Crabgrass Control at the rate of 10 lbs. per 1,000 Square Feet (25 lb. bag covers 2,500 Square Feet). Apply after the 1st or 2nd mowing in Spring before the crabgrass and other annual grass weeds emerge. Highly effective for lawns seeded the previous Fall as well as older grass areas. If it does not rain for 3 days after the application, water the treated area thoroughly for best results.
3. NEW SPRING SEEDINGS—For new Spring grass seedings, apply Agrico Pre-Emergence Crabgrass Control at the rate of 5 lbs. per 1,000 Square Feet (25 lb. bag covers 5,000 Square Feet). Apply immediately after seeding which should be early to mid Spring before crabgrass or other annual grass weeds emerge. If it does not rain for 3 days after application, water the treated area thoroughly for best results.
4. Spinner-type spreaders are not recommended.
5. Follow the caution section on the label.

WARRANTY

Agrico Chemical Company, a Division of Continental Oil Company, makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. The Buyer assumes all liability for damage or injury or death resulting from the use of this product, or any other product, in any manner not intended by the manufacturer.
