Dinitro General Weed Miller is intended for use in non-crop areas such as roadsides, fance rows, around farm buildings, industrial buildings and industrial altes. Use 2 to 4 quarts as indicated in the

gallons of water is required, use the listed amount in each 100 gallons of water. Apply this mixture in sufficient volume to thoroughly wet all weed and grass foliage to the "run off" point.

# ORCHARD FLOOR:

Apply as a directed spray to weed ground cover under Apples, Cherries, Citrus, Peaches, Pears, Pecans, and Plums. For best results treat when weeds are 3-12 inches high. Mix 2 to 3 quarts of General Weed Killer in 100 gallons of water as indicated in the preceeding table. Apply as a coarse spray and thoroughly cover all weed foliage. Do not apply below 70°F or above 95°F. Do not apply more than 3 quarts of Dinitro General Weed Killer per acre to the indicated crop areas. Keep spray off fruit and foliage. Destroy any fruit accidentally sprayed. Avoid spraying the base of trees as girdling may occur.

The manufacturer makes no warranties, expressed or implied, concerning this product or its use, which extend beyond the description on the face hereof. Buyer assumes all risks of use, handling, or storage of this material not in strict accordance with the directions and precautions given herewith.
