

DIRECTIONS FOR USE

This solution is formulated for use in thermal and exhaust type fogging devices without dilution.

Inflammable mixture—Before filling be sure fogging device is shut off, cool, and in good working order. Fill insecticide container of fogging device to level recommended by manufacturer. Properly close insecticide container of fogging device and wipe free of spillage before starting.

Apply at a rate of 1 gallon of solution per acre (3 fl. oz. per 1,000 sq. ft.), when wind velocity is below 4 miles per hour. Best fogging conditions usually exist from one hour after sunset until sunrise.

Do not apply to or allow drift to crops used for food, feed, or fodder.

Use only in outdoor areas. Direct fogging device so that fog will not go to humans, animals or open dwellings.
