DIRECTIONS

Benomyl Fungicide is recommended for the control of certain diseases of roses, flowers, ornamentals, and turf. It is highly effective for the control of many fungus diseases, providing both curative (eradicant) action and protective action. Benomyl Fungicide is a wettable powder to be mixed with water for application as a spray. Addition of a spreader-sticker such as SA-50 Brand Polyethylene Spreader-sticker to the spray mixture enhances curative action of the fungicide and improves distribution of the spray on hard-to-wet plants such as roses.

ROSES — Powdery Mildew, Black Spot: Use one tablespoonful per 2 gals. of water. Begin application when disease first appears and repeat at 10 to 14 day intervals throughout the growing season; shorten intervals during humid, rainy weather.

FLOWERS, ORNAMENTALS such as aster, chrysanthemum, snapdragon, crepe myrtle, azalea, gardenia and hydrangea — Powdery Mildew, Botrytis, Grey Mold: Use one tablespoonful per 2 gals. of water. Begin application when disease first appears and repeat at 10 to 14 day intervals as long as needed.

BULB DIP — Tulip, Iris, Easter Lily, Daffodil, and Gladiolus Bulbs and corms for control of Fusarium basal rot and Penicillium infections. Dip clean bulbs in a warm water (80-85°F) suspension of Benomyl Fungicide (2 tablespoonsfuls per gallon) for 30 minutes, within 48 hours after digging. Maintain suspension with sufficient agitation. Dry bulbs after treatment for storage.

TURF — Dollar Spot (Sclerotinia), Large Brown Patch (Rhizoctonia) at the rate of 2 oz. (12 tablespoons ft. in sufficient water to obtain the age, usually 2 to 5 gals. per 1000 sq. earliest appearance of disease and up to 14 day intervals as long as needed. Conditions favor drift from areas treated and contaminate water by cleaning of disposal of wastes. Apply this product as specified on this label.

This product is toxic to fish. Keep streams or ponds. Do not apply when likely to occur. Do not apply when conditions favor drift from areas treated. Do not apply this product to contaminate water by cleaning or disposal of wastes. Apply this product as specified on this label.

Buyer assumes all risk of use handling not in strict accordance directions and precautions given her.

Benomyl Fungicide

ACTIVE INGREDIENT
Benomyl [Methyl 1-(butylcarbamoyl)-2-benzimidazolecarbamate] 50%

INERT INGREDIENTS 50%

U.S. Pat Pending

KEEP OUT OF REACH OF CHILDREN

CAUTION: MAY IRRITATE EYES, NOSE, THROAT, AND SKIN

Avoid breathing dust. Avoid contact with skin, eyes, and clothing. Wash thoroughly after using. Keep away from fire or sparks.

In case of contact, flush skin or eyes with plenty of water; for eyes, get medical attention.

IMPORTANT—Never allow Benomyl Fungicide to become wet during storage. This may lead to certain chemical changes which will reduce the effectiveness.

Keep container closed when not in use. Do not re-use container; destroy when empty.

TURF — Dollar Spot (Sclerotinia homeocarpa), Large Brown Patch (Rhizoctonia solani): Apply at the rate of 2 oz. (12 tablespoons) per 1000 sq. ft. in sufficient water to obtain thorough coverage, usually 2 to 5 gals. per 1000 sq. ft. Apply at earliest appearance of disease and continue at 10 to 14 day intervals as long as needed. When conditions are unusually favorable for development of disease, reduce interval to 5 to 7 days. Do not graze or feed clippings from treated areas to livestock.

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

Buyer assumes all risk of use, storage, or handling not in strict accordance with the directions and precautions given herewith.
