

**Lawn Edge Concentrate** is an effective contact spray for use on weeds and grasses along the edges of driveways, walks, flower beds, plant beds and similar locations. It can also be used for killing many kinds of undesirable woody plants such as poison ivy, poison oak, poison sumac, brambles and tree sprouts.

Mix one pound, the contents of this package, with one gallon of water in either sprayer or sprinkling can. Apply as a drenching spray, thoroughly wet foliage. For difficult to wet foliage add 1/4 teaspoonful of SA-50 Brand Polyethylene Spreader Sticker or liquid household detergent per gallon. For area treatments such as driveways and tennis courts use a gallon of finished spray for each 25 square feet treated.

<b>ACTIVE INGREDIENTS:</b>		
Ammonium Sulfamate	_____	95.0%
<b>INERT INGREDIENTS</b>	_____	5.0%
		<b>100.0%</b>

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION:** Avoid contact with skin and eyes. Do not breathe spray mist. In case of contact, wash with plenty of water; for eyes flush with water and obtain medical attention. Do not reuse containers. Destroy when empty. Buyer assumes all risks of use, storage, or handling of this material not in strict accordance with directions and precautions given herewith.

Some species of plants are difficult to control and retreatment may be necessary. In general, however, the degree of control and duration of effect will vary with weed species, rainfall, temperature, and other conditions.

Direct sprays away from desirable plants to avoid injury. Do not spray on windy days to drift. This material is non-selective; do not apply to, drain, or flush equipment on desirable plants or vegetation.

**IMPORTANT:** Wash sprayer thoroughly after use to remove all residues and to reduce corrosion.

This material absorbs moisture readily; keep package tightly closed.
