USE DIRECTIONS - PESTS OUTDOORS

PEST OF TURF ON SOD FARMS, GOLF COURSES (turf), ROAD MEDIANS, AND INDUSTRIAL PLANT SITES. (Not for residential use.)

Use DURSBAN 4-E to control the pests listed below by application at the recommended dosages and in accordance with the directions given below. Dilute DURSBAN 4-E in enough water to obtain complete and uniform coverage of pest infested areas and apply as a coarse, low-pressure spray using suitable application equipment. Thoroughly water immediately after treatment to wash the insecticide into the turf, except as noted. For best results, the turf should be moist at time of treatment.

INSECTS CONTROLLED - Ants, Armyworms, Brown dog tick, Chiggers, Chinch bugs, Clover mite, Crickets, Cutworms, Earwigs, Fleas, Grasshoppers, Sod Webworms. Use 3/4 fl. oz. per 1,000 sq. ft (1 Qt per acre). Spray when pests first appear; re-treat when needed. For sod webworms delay watering or mowing the treated area for 12 to 24 hours after treatment. Use 3-6 gals. water per 1,000 sq. ft.

Area Control of Ticks and Chiggers: Use DURSBAN 4-E to control ticks and chiggers infesting non-cropland areas where these pests are present and create a nuisance or possible public health problem. Apply DURSBAN 4-E in water at the rate of 1/2 pint per acre (equivalent to 1/2 fl. oz. per 2,700 sq. ft.) using hydraulic sprayer, mist applicator, knapsack sprayer, or other suitable hand or power spray equipment. Treat low underbrush, grassy areas, weeds and ground surface and debris using enough spray volume to obtain thorough coverage usually 40 to 100 gallons per acre. **ATTENTION:** Do not allow public use of treated areas during application or until spray has dried.

NOTE: Mosquitoes coming to rest on areas treated for control of turf will be killed for varying periods of time after treatment depending on exposure of treated areas to weathering conditions.

TO HELP PREVENT INFESTATIONS OF BUILDINGS (Industrial plant sites only)

For Ants, Crickets, Earwigs, and Sowbugs (pillbugs), treat a band of soil 6 to 10 feet wide around and adjacent to the building, also the building foundation to a height of 2 to 3 feet, where pests are active and may find entrance. Use the same dosage and dilution recommended for control of these pests on turf as shown under **PESTS OF TURF**. Apply as a coarse spray to thoroughly and uniformly wet the band area.

Dilute DURSBAN 4-E Insecticide with water according to following directions and apply using a suitable hand or power spray equipment in a manner to provide complete and uniform coverage of infested plants. Avoid overspraying to the point of excessive runoff. Treat when pests appear and repeat at 7 to 10 day intervals, if needed. **NOTE:** Do not use on azaleas, camellias, poinsettias, rose bushes or variegated ivy because of possible injury to these plants.
